i2 iBase Essentials

CODE:	LENGTH:	PRICE:
U49I213G	16 Hours (2 days)	kr15,770.00

Description

This 2-day instructor-led course focuses on a basic introduction of iBase functionality. The student will gain an understanding of how to use i2 iBase to add data, perform basic analysis and create charts in conjunction with i2 Analyst's Notebook.

Objectives

This basic level workshop will teach delegates to search and browse the database and demonstrate how to populate an iBase database manually (add, edit and delete records). Additionally, how to create queries and learn to use Search 360. It will also allow delegates to visualize data and produce charts in Analyst's Notebook through iBase as well as exporting data out of iBase

Audience

Students wishing to understand the basics of i2 iBase technology and capabilities

Prerequisites

- Completed i2 Analyst's Notebook Essentials course if the iBase is being used in conjunction with that product.
- Basic knowledge of using Windows analysis techniques.

Follow on courses

U49I14G - i2 iBase User & U49I15G - i2 iBase Designer
