Arrow Academy

Fortinet

Build on your knowledge and grow your
A sure way to success!

Build on your knowledge and grow your business. A sure way to success!

Arrow offers to help raise the technical level of our partners; from brand new technicians who need to learn about infrastructure, networking and security, to a high technical level with insight into (central) management, troubleshooting, building networks, operation, maintenance, enhanced security and security/network architecture.

We offer an exciting training series with support all the way. At the same time, you are offered sales training to your desired level and in the product areas you require. At the same time that we create together a Fortinet business plan for 2023.

Return of Investment

With this programme, you can choose to go the whole way or get on board at the stage that suits you

The course covers NSE4, NSE5 and NSE7 as well as Fast Tracks and other offers which dive down in individual elements.

You can participate in just the parts you want. By raising your technical level at Fortinet, you can also raise your partner level with more benefits and better prices as a result. Once you have achieved the technical certifications and the turnover target in the business plan, you will get 50% of the investment in the training back.

Upon passing the Academy, you are offered admission to Arrow's Fortinet Partner User Group, where you are invited to various exciting events.

Program

Date	Title	No. Days	Criteria for participation	Price
16. March	Introduction <ul style="list-style-type: none"> Unboxing Fortinet Initial config Best practice Support handling Demos 	1 Day	Here, the only prerequisites are that you have an interest in Fortinet and that you will be well prepared for the NSE4 course.
