Description

This five-day, hands-on training course provides you with the knowledge and skills to deploy a VMware® Aria Operations™ cluster that meets the monitoring requirements of your environment. This course includes advanced capabilities, such as customizing alerts, views, reports, and dashboards, and explains the deployment and architecture in VMware Aria Operations. This course explains application monitoring, certificates, policies, capacity and cost concepts, and workload optimization with real-world use cases. This course covers troubleshooting using the workbench, alerts, and predefined dashboards, and how to manage compliance and configurations. This course also covers several management packs.

Vstupní znalosti

Before taking this course, you must meet at least one of the following requirements:

VMware vSphere®: Install, Configure, Manage

6 months of hands-on VMware Aria Operations experience

Program

- Course Introduction
- Introduction to VMware Aria Operations
- VMware Aria Operations Architecture
