Description

In this 2-day class, you will learn advanced FortiGate networking and security. Topics include features commonly in complex or larger enterprise/MSSP networks, such as advanced routing, transparent mode, redundant infrastructure, advanced IPsec VPN, IPS, SSO, data leak prevention, diagnostics, and fine-tuning performance.

Toto školení pořádá společnost DataScript s.r.o.

Cíle

After completing these courses, you will be able to:

- Deploy FortiGate devices as an HA cluster for fault-tolerance & high performance
- Inspect traffic transparently, forwarding as a Layer 2 device
- Manage FortiGate device's route table
- Route packets using policy-based and static routes for multi-path and load-balance deployments
- Connect virtual domains (VDOMs) without packets leaving FortiGate
- Implement a meshed / partially redundant VPN
- Diagnose failed IKE exchanges
- Fight hacking & denial of service (DoS)
- Diagnose IPS engine performance issues
- Offer Fortinet Single Sign On (FSSO) access to network services, integrated with Microsoft Active Directory
- Inspect SSL/TLS-secured traffic to prevent encryption used to bypass security policies
- Understand encryption functions and certificates
- Defend against data leaks by identifying files with sensitive data, and blocking them from leaving your private network
- Diagnose and correct common problems
- Optimize performance by configuring to leverage ASIC acceleration chips, such as CP or NPs, instead of only the CPU resources
- Implement IPv6 and hybrid IPv4-IPv6 networks

Určeno pro

Networking and security professionals involved in the design, implementation, and administration of a security infrastructure using FortiGate appliances.

This course assumes knowledge of basic yet FortiGate-specific fundamentals. As a result, if you know about firewalls, but are new to Fortinet, we do not recommend that you skip FortiGate I.

Vstupní znalosti

- Knowledge of OSI layers
- Good knowledge of firewalling concepts in an IPv4 network
- Familiarity with all topics presented in the prerequisite FortiGate I cours

Program

Routing
Virtual Networking
Transparent Mode
High Availability
Advanced IPsec VPN
IPS
FSSO
Certificate Operations
DLP
Diagnostics
Hardware Acceleration
IPv6
