# Veeam Backup & Replication v12.1: Configure, Manage and Recover

<b>CODE:</b>	<b>LENGTH:</b>	<b>PRICE:</b>
VEE_VMCE_12_1	32 Hours (4 dage)	kr 22,800.00

## Description

The Veeam® Backup & Replication™ v12.1: Configure, Manage and Recover training course is a four-day technical course focused on teaching IT professionals the skills to configure, manage and support a Veeam Backup & Replication v12.1 solution. With extensive hands-on labs, the class promotes situational resiliency in responding to recovery scenarios and enables administrators and engineers to effectively protect and manage data in an ever-changing technical and business environment, bringing tangible benefit to business in the digital world. This course is based on Veeam Backup & Replication v12.1, part of Veeam Data Platform.

## Objectives

After completing this course, attendees will be able to:

- Describe Veeam security concepts
- Given a scenario, configure a backup job and a backup copy job
- Explain network-attached storage (NAS) backups and configuration
- Describe Veeam's replication capabilities
- Determine appropriate use case for backups, replicas and/or continuous data protection
- Configure backup infrastructure components, including proxy and repository servers
- Given a scenario, evaluate when and how to apply immutability settings
- Given a scenario, recover data from backups

## Audience

This course is suitable for anyone responsible for configuring, managing or supporting a Veeam Backup & Replication v12.1 environment.

## Prerequisites

Students should have fundamental IT experience working with networking, servers, storage, cloud, virtualization and operating systems.

To get the most out of this course, students should be familiar with the core fundamental concepts of Veeam Backup & Replication through hands-on experience.

## Programme

### Data protection strategies

Review of key data protection strategies that ensure the safety of your data.

## **Risk scenarios**

Explore different risk scenarios, what risks do we face daily within our environment?

## **Core components**

Review of Veeam Backup & Replication components required in most deployments, their purpose and key system requirements.

## **Initial security considerations**

Describe strategies and tools to secure the Veeam backup server to avoid unauthorized access and data leaks.

## **Virtual machine backup**

Efficiently protect VMware and Hyper-V virtual machines based on well-defined SLAs through the creation of backup jobs.

## **Agent backup**

Identify the use of protection groups to automate the installation of Veeam Agents and protecting workloads with agent backup jobs.

## **Unstructured data backup**

List required components and features available to protect unstructured data.

## **Backup data optimizations**

Analyze features and settings that allow backup storage optimization, faster backups and data consistency.

## **Immutability and hardened repositories**

Describe backup data protection mechanisms to avoid premature deletion and unwanted modifications. Identify characteristics and deployment steps of Linux Hardened Repositories to achieve backup data immutability.

## **Object storage**

Review why backing up to object storage, which object storage solutions are supported and considerations when using this type of repositories.

## **Transport modes**

Analyze different ways data can be read from the production environment and their benefits and considerations.

## **Backup copies**

Ensure recoverability and adhere to the 3-2-1 Rule with backup copy jobs.

## **Scale-out Backup Repository™**

Describe architecture, placement policies, data tiers and management of Scale-out Backup Repositories.

## **Moving or copying backups**

Identify use cases for workload and backup migrations with VeeamMover.

## **Replication**

Describe use cases, architectures and features of replication jobs and continuous data protection (CDP) policies.

## **Verifying recoverability**

Create automated tests to ensure recoverability from backups and replicas.

## **Veeam Backup Enterprise Manager**

Describe the use cases for Veeam Backup Enterprise Manager.

## Incident Response Planning

Integrating Veeam Backup and Replication into your incident response plan.

## Recovery scenarios and features

What are the implications of different recovery methods and selecting the correct recovery method.

## Enacting a recovery

Get practice in recovering different recovery types with a variety of data types.

## Veeam Data Platform

Identify and explain the purpose of each core product within the Veeam Data Platform and articulate potential use cases for them.

## Test and Certification

Completion of this course satisfies the prerequisite for taking Veeam Certified Engineer (VMCE™) v12 exam.

## Session Dates

Date	Location	Time Zone	Language	Type	Guaranteed	PRICE
02 Sep 2024	København - Ballerup	CEDT	English	Classroom	Yes	kr 22,800.00
07 Oct 2024	Århus - Viby	CEDT	Danish	Classroom	Yes	kr 22,800.00
23 Sep 2024	Virtual Classroom (CET / UTC +1)	CEDT	English	Instructor Led Online		kr 22,800.00
21 Oct 2024	Virtual Classroom (CET / UTC +1)	CEDT	English	Instructor Led Online		kr 22,800.00
02 Dec 2024	Virtual Classroom (CET / UTC +1)	CET	English	Instructor Led Online		kr 22,800.00
