Introduction to Containers Kubernetes and Red Hat OpenShift

CODE: **LENGTH:**   **PRICE:**

REH_DO180   16 Hours (2 dage)   kr 28,300.00

Description

Introduction to Containers, Kubernetes, and Red Hat OpenShift (DO180) helps you build core knowledge in managing containers through hands-on experience with containers, Kubernetes, and the Red Hat® OpenShift® Container Platform. These skills are needed for multiple roles, including developers, administrators, and site reliability engineers.
This course is based on Red Hat OpenShift Container Platform 4.2

Audience

•Developers who wish to containerize software applications
•Administrators who are new to container technology and container orchestration
•Architects who are considering using container technologies in software architectures
•Site reliability engineers who are considering using Kubernetes and Red Hat OpenShift

Prerequisites

•Be able to use a Linux terminal session, issue operating system commands, and be familiar with shell scripting
•Have experience with web application architectures and their corresponding technologies
•Being a Red Hat Certified System Administrator (RHCSA®) is recommended, but not required

Programme

•Understand container and OpenShift architecture.
•Create containerized services.
•Manage containers and container images.
•Create custom container images.
•Deploy containerized applications on Red Hat OpenShift.
•Deploy multi-container applications.

Session Dates

På anmodning. Kontakt os venligst
