## Description

In this course, you will learn how to deploy and manage FortiSASE to provide secure internet access and protect access to Software-as-a-Service (SaaS) applications for users working from on-site or remote locations. These topics will help you build a fundamental knowledge of FortiSASE basics, and learn how to enforce security policies using endpoint profiles and content inspection.

## Objectives

After completing this course, you will be able to:

- Describe the SASE architecture
- Construct FortiSASE deployment cases
- Identify the SASE components
- Describe the Fortinet SASE solution
- Integrate FortiSASE into a hybrid network
- Describe the different FortiSASE solutions
- Describe different authentication methods on FortiSASE
- Configure security profile groups and security components
- Configure different types of FortiSASE policies
- Deploy supported FortiSASE use cases
- Configure FortiView monitors
- Configure and generate reports
- Configure dashboards

## Audience

Networking and security professionals involved in the design, administration, and management of FortiSASE-based network deployment should attend this course.
