TCP/IP Analysis with Wireshark

CODE:	LÄNGE:	PREIS:
WIS_NAW-ENG	24 Hours (3 Tage)	€2,170.00

Description

The TCP/IP family is the most widely used group of protocols used in today's communication systems. Detailed knowledge and understanding of the different elements, functions and terms is essential for troubleshooting network problems and optimizing performance.

This practical training provides you with all the relevant information. During hands-on exercises using trace files with popular errors you learn how to use Wireshark to isolate network problems and bottlenecks. All the most valuable Wireshark features like filters, graphs and TCP expert system etc. will be covered and will help you to find network issues faster.
