# Symantec Data Loss Prevention 15.5 Policy Authoring and Incident Remediation

CODE:	LÄNGE:	PREIS:
SYM_00034601	16 Hours (2 Tage)	€1,600.00

## Description

The Symantec Data Loss Prevention 15.5 Policy Authoring and Incident Remediation course is intended for DLP policy authors and incident remediators who need to understand how to create, maintain, and refine DLP policies and how to create effective incident remediation workflows to drive toward their organization's data-loss risk reduction goals.

The hands-on labs include exercises for authoring policies (detection rules and response rules) and performing incident detection, incident response, and incident reporting.

The course assumes that Symantec Data Loss

Prevention (DLP) is already implemented in the organization's environment, and is configured to cover the relevant vectors for the organization: Data in Motion, Data at Rest, and Data in Use, whether on-premises or in the cloud. For this reason, the course does not cover how to implement, maintain, or troubleshoot the servers and cloud components of the DLP product suite, or the technical configuration of individual DLP products beyond policy authoring and incident remediation.

Note: This course is delivered on a Microsoft Windows platform.

## Lernziel

By the end of this course, you will be able to create policies, and track and remediate incidents in Symantec Data Loss Prevention 15.5.

## Voraussetzungen

A general understanding of the channels that are covered in your DLP implementation  
An understanding of the types of confidential data your organization wants to protect

## Inhalt

Module 1: Overview of Risk-Reduction Processes for your Data Loss Prevention Program Data-loss risk-reduction frameworks  
Symantec Data Loss Prevention Coverage Identifying Confidential data in your organization  
Data Loss Prevention Policy and remediation process Module 2: Identifying and Describing Confidential Data  
Configuring Symantec Data Loss Prevention to recognize confidential data Described Content Matching (DCM)  
Exact matching (EDM and EMDI) Indexed Document Matching (IDM) Vector Machine Learning (VML) Sensitive Image Recognition  
Using Policy Templates Exporting Policies Hands-On Labs  
: Create policy groups; configure a policy for Personally Identifiable Information (PII) detection; configure a policy for PCI  
compliance; configure a policy to protect confidential documents; configure a policy to protect source code; configure a policy for  
Form Recognition; use a template to add a DLP policy; export policies for use at a Disaster Recovery (DR) site; configure Optical  
Character Recognition (OCR).  
Module 3: Protecting Confidential Data using your Data-Loss-Prevention Policies  
Using response rules in DLP policies to protect confidential data Providing notifications of user policy violations  
Protecting confidential data in motion Protecting confidential data in use Protecting confidential data at rest Hands-On Labs  
: Configure email notifications; configure onscreen notifications; configure SMTP blocking; configure endpoint User Cancel; scan  
and quarantine files on a server file share target  
Module 4: Remediating Data Loss Incidents and Tracking Risk Reduction Reviewing risk management frameworks  
Using incident reporting options to identify and assess risk Creating tools that support the organization's risk reduction process  
Communication risk to stakeholders Understanding Information Centric Analytics (ICA) Hands-On Labs:  
Configure roles and users, use reports to track risk exposure and reduction, define incident statuses and status groups, configure  
and use Smart Responses, schedule and send reports, evaluate incidents and modify policies  
Module 5: Course review Review of Risk-Reduction Processes for your Data Loss Prevention Program  
Review of Identifying and Describing Confidential Data in Your Data Loss Prevention Policies
