Symantec Control Compliance Suite 12 Administration

CODE:	LÄNGE:	PREIS:
SYM_00033197	24 Hours (3 Tage)	€2,400.00

Description

The Symantec Control Compliance Suite 12 Administration course is designed for professionals who are tasked with ensuring the security of their computing enterprise and compliance with both external and internal mandates. This course focuses on using Control Compliance Suite 12 to define security controls that govern the enterprise, assess compliance with standards and other mandates, and create reports and dashboards to demonstrate compliance and show deficiencies to multiple audiences.

Lernziel

Describe current security risk and compliance challenges
Define methods of proactive security
Describe CCS 12 and how it helps meet security and compliance needs
Describe general CCS 12 pre-deployment considerations
Install CCS 12
Perform initial CCS configuration tasks
Import assets and common fields
Describe how to install CCS Agents
Perform data collection and evaluation
Describe the components of standards
Copy and edit standards.
Evaluate collected data in terms of a standard
Describe compliance and risk scores
Manage exceptions
Create, edit, and map control statements
Use Controls Studio to eliminate duplication of controls
Describe mandates, policies, and control statements
Build queries to gather data quickly from assets
Add external data integration and configure data connectors
Use CCS reporting features
Create, edit, and manage dashboards
Investigate contingencies using a "what if?" analysis in dynamic dashboards

Inhalt

Module 1: Introduction to CCS 12
   Overview of Security and Compliance
   Proactive Security
   Intro to CCS 12.0
   Implementing Security and Compliance with CCS 12.0
Module 2: Installing the CCS Suite
General pre-deployment considerations
Installation requirements
Installation tasks
Module 3: Initial Configuration
Getting started tasks
Preparing for data collection
Module 4: Getting started with CCS 12
Importing assets
Installing a Unix Agent
Collecting and evaluating data

Module 5: Standards Manager/CVSS and
Risk Score
Working with standards
Assessing compliance with standards
Managing exceptions

Module 6: Controls Studio
About Controls Studio
Working with Controls Studio
Module 7: Ad hoc queries
Query building
Querying your enterprise
Module 8: External data integration
Connecting to external data sources
Overview of third-party connectors
Module 9: Reporting and dashboards
Reporting overview
Working with dynamic dashboards
