- Describe BLAST configuration verification using logs and settings.
- Describe how Horizon connections work and how to troubleshoot issues.
- Describe the use of TLS/ SSL certificates in Horizon and list troubleshooting steps for common problems.
- Describe Cloud Pod Architecture troubleshooting scenarios.
- Learn about the command line tools available.
- · Learn the importance of optimizing Windows for use in Horizon and learn what should be optimized to improve system performance and reliability.
- Discuss how to troubleshoot problems related to instant clone VMs.
- Identify steps that you can follow to solve problems related to Horizon Client.
- Discuss troubleshooting steps applicable to device redirection in HorizonTroubleshoot redirection common problems.

Zielgruppe

Intermediate to advanced practitioners that support Horizon 8 environments.

Voraussetzungen

Recommended:

- A working knowledge of Omnissa Horizon infrastructure
- A background in End-User Computing
- Completed Horizon Deploy and Manage course

Technical requirements

- · Bring a full-size laptop.
- · A secondary device is recommended for reading and lab materials, which are only delivered electronically.
- Please ensure you have the US keyboard mapping added to your devices.

Inhalt

- 1 Course introduction
- · Introductions and course logistics
- · Course objectives
- 2 Review of Omnissa Horizon
- Review Horizon 8 architecture
- 3 Introduction to troubleshooting

- · How to troubleshoot
- · Troubleshooting resources

4 Horizon infrastructure troubleshooting

- Horizon Connection Server general troubleshooting
- Active Directory Lightweight Directory Service replication
- · Working with Horizon Connection Server logs

5 Unified Access Gateway troubleshooting

- Unified Access Gateway deployment errors
- · Monitor the Unified Access Gateway
- Troubleshoot a Unified Access Gateway Certificate
- Tools for troubleshooting connections on the Unified Access Gateway
- Troubleshooting the Unified Access Gateway

6 Blast configuration verification

• How to verify the current Blast configuration

7 Blast optimization

- · Blast optimization overview
- Optimizing Blast for Wide Area Networks
- · Work from home and home office to cloud
- · Optimizing for quality

8 Horizon connections troubleshooting

- Understanding Horizon connections
- · Horizon connections load balancing
- Troubleshooting Horizon connections
- Key ports and protocols
- Black screen

9 TLS certificate troubleshooting

- Horizon 8 TLS certificates
- Troubleshooting TLS certificates in Horizon 8

10 Cloud Pod architecture troubleshooting

Cloud Pod architecture troubleshooting

11 Command line tools

- · About the command line tools and how to use them
- · Backing up and restoring Horizon 8 databases

12 Troubleshooting machines and desktops

- · Help Desk tool deep dive
- Troubleshooting machines and desktops
- Troubleshooting Linux desktops

13 Optimizing Windows desktops and servers

- Why optimize a Windows image?
- Windows OS optimization tool for Horizon
- Using automation to build optimized Windows images

14 Troubleshooting instant clones

• Troubleshooting instant clones

15 Troubleshooting Horizon Client

- Horizon Client for Windows
- Horizon Client for Linux
- Horizon Client for Mac
- Horizon Web Client (HTML Access)

16 Troubleshooting device redirection

- Device redirection
- Nested RDSH redirection
