Check Point Deployment Administrator (CPDA) R82 - NOW AVAILABLE!

CODE:	LÄNGE:	PREIS:
CKT_CPDA_R82	16 Hours (2 Tage)	€1,950.00

Description

This course provides students with the fundamental knowledge, skills, and hands-on experience needed to deploy a new Quantum Security Environment. Students learn how to install and perform basic configuration of SmartConsole, the Gaia Operating System, a Security Management Server, and a Security Gateway. Additionally, students learn how to create a basic policy, deploy a Security Gateway Cluster, configure a Dedicated Log Server, perform maintenance tasks including System Backups and Snapshots and batch import Objects and Rules.

Zielgruppe

- Deployment Administrators • Security Administrators • Security Consultants

Voraussetzungen

Base Knowledge • Unix-like and/or Windows OS • Internet Fundamentals • Networking Fundamentals • Networking Security
• System Administration • TCP/IP Networking • Text Editors in Unix-like OS Check Point Courses • No prerequisite courses

Inhalt

Module 1: Introduction to Quantum Security

- Identify the primary components of a Check Point Three-Tier Architecture and explain how they work together in the Check Point environment.

Module 2: Quantum Security Architecture • Identify key considerations when planning a new Quantum Security deployment.

Lab Tasks • Verify the Check Point Hosts • Document the Network Environment • Verify the A-GUI Client Host

Module 3: Primary Security Management Server Deployment

- Identify the basic workflow, guidelines, and best practices for a Primary Security Management Server deployment. **Lab Tasks**
- Install the Gaia Operating System • Configure the Primary Security Management Server • Deploy SmartConsole

Module 4: Security Gateway Deployment

- Identify the basic workflow, guidelines, and best practices for a Security Gateway deployment. **Lab Tasks**
- Run the First Time Wizard on the Security Gateway • Create a Security Gateway Object • Test SIC and Install Licenses

Module 5: Policy Fundamentals

- Describe the essential elements of a Security Policy.
- Identify features and capabilities that enhance the configuration and management of the Security Policy. **Lab Tasks**
- Create an Access Control Policy Package • Add and Modify a Rule in the Access Control Policy

Module 6: Security Gateway Cluster Deployment

- Identify the basic workflow, guidelines, and best practices for a Security Gateway Cluster deployment. **Lab Tasks**
- Reconfigure the Security Environment • Configure Cluster Members as Security Gateways • Configure Cluster Member Interfaces
- Add Members to the Clusters • Add Licenses to the Cluster Members **Module 7: Dedicated Log Server Deployment**
- Identify the basic workflow, guidelines, and best practices for a dedicated Log Server deployment. **Lab Tasks**
- Configure a dedicated Log Server • Add a dedicated Log Server **Module 8: Maintenance Fundamentals**
- Explain the purpose of a regular maintenance strategy.
- Identify the basic workflow, guidelines, and best practices for Backup/Restore, Snapshot Management, Load/Save Configuration, Hardware Health Monitoring, and Software Updates.

Lab Tasks • Collect and Download System Backups • Collect and Download Snapshots

Module 9: Batch Import of Security Environment Components • Describe purpose of a batch import and give import use cases.

- Identify the basic workflow, guidelines, and best practices for a batch import. **Lab Tasks** • Import and Create Host Objects
- Import and Create Network Objects • Import and Create Group Objects • Import and Create Access Control Rules
