MD-102T00 : Microsoft 365 Endpoint Administrator

CODE:

MCS_MD-102T00A

LÄNGE:

40 Hours (5 Tage)

PREIS:

€2,590.00

Description

In this course, students will learn to plan and execute an endpoint deployment strategy using contemporary deployment techniques and implementing update strategies. The course introduces essential elements of modern management, co-management approaches, and Microsoft Intune integration. It covers app deployment, management of browser-based applications, and key security concepts such as authentication, identities, access, and compliance policies. Technologies like Azure Active Directory, Azure Information Protection, and Microsoft Defender for Endpoint are explored to protect devices and data.

Zielgruppe

The Microsoft 365 Endpoint Administrator is responsible for deploying, configuring, securing, managing, and monitoring devices and client applications in a corporate setting. Their duties include managing identity, access, policies, updates, and apps. They work alongside the M365 Enterprise Administrator to develop and execute a device strategy that aligns with the requirements of a modern organization. Microsoft 365 Endpoint Administrators should be well-versed in M365 workloads and possess extensive skills and experience in deploying, configuring, and maintaining Windows 11 and later, as well as non-Windows devices. Their role emphasizes cloud services over on-premises management technologies.

Voraussetzungen

The Modern Desktop Administrator must be familiar with M365 workloads and must have strong skills and experience of deploying, configuring, and maintaining Windows 11 and later, and non-Windows devices.

Inhalt

- MD-102 Explore endpoint management
- MD-102 Execute device enrollment
- MD-102 Configure profiles for user and devices
- MD-102 Examine application management
- MD-102 Manage authentication and compliance
- MD-102 Manage endpoint security
- MD-102 Deploy using on-premises based tools
- MD-102 Deploy using cloud based tools
