Microsoft Security Fundamentals Bundle with Microsoft Identity and Access Administrator

CODE:	LÄNGE:	PREIS:
MCS_SC9FSC300	40 Hours (5 Tage)	€2,100.00

Description

With this bundle, you get a quick introduction to the fundamentals of security, compliance, and identity (SCI) across cloud-based and related Microsoft services. In addition, you will acquire the necessary know-how to become a "Microsoft Certified: Identity and Access Administrator Associate".

Benefit from two courses and pay for only one at 40% discount. **You will start with the 1-day fundamentals webinar:** "SC-900T00: Microsoft Security, Compliance, and Identity Fundamentals"

This webinar provides foundational level knowledge on security, compliance, and identity concepts and related cloud-based Microsoft solutions.

After attending the fundamentals webinar your learning journey will continue with:

The official 4-days virtual classroom "SC-300T00: Microsoft Identity and Access Administrator"

Please click the link below to review the schedule and outlines of this official Microsoft course.

[Microsoft Identity and Access Administrator](#) **Opportunity to become certified:**

This bundle also includes an exam voucher, which you can use to take the exam to become a "Microsoft Certified: Identity and Access Administrator Associate".

Please indicate your preferred date for the second course "SC-300T00: Microsoft Identity and Access Administrator" in the comments field of the shopping cart for this bundle.

The following outlines and timetable represent the content as well as the planning of the one-day fundamental webinar.
Follow On Courses: MCS_MS9FMS102 - Microsoft 365 Fundamentals Bundle with Microsoft 365 Administrator Essentials Or MCS_MS-102T00 - MS-102T00: Microsoft 365 Administrator Essentials

Lernziel

- Describe basic concepts of security, compliance, and identity.
- Describe the concepts and capabilities of Microsoft identity and access management solutions.
- Describe the capabilities of Microsoft security solutions.
- Describe the compliance management capabilities in Microsoft.

Zielgruppe

The audience for this course is looking to familiarize themselves with the fundamentals of security, compliance, and identity (SCI) across cloud-based and related Microsoft services. The content for this course aligns to the SC-900 exam objective domain. Candidates should be familiar with Microsoft Azure and Microsoft 365 and understand how Microsoft security, compliance, and identity solutions can span across these solution areas to provide a holistic and end-to-end solution.

Voraussetzungen

Before attending this course, students must have:

- General understanding of networking and cloud computing concepts.

- General IT knowledge or any general experience working in an IT environment.
- General understanding of Microsoft Azure and Microsoft 365.

Inhalt

Module 1: Describe basic concepts of security, compliance, and identity.

Learn about core concepts, principles, and methodologies that are foundational to security, compliance, and identity solutions, including Zero-Trust, shared responsibility, our privacy principles, and more.

Lessons

- Describe security concepts and methodologies.
 - Describe Microsoft security and compliance principles.
- After completing this module, students will be able to:

- Describe security concepts and methodologies.
- Explore the Service Trust Portal.
- Know where to go to find and review Azure compliance documentation.

Module 2: Describe the concepts and capabilities of Microsoft identity and access management solutions

Learn about Azure AD services and identity principals, secure authentication, access management capabilities, as well as identity protection and governance.

Lessons

- Describe identity concepts
 - Describe the basic services and identity types of Azure AD
 - Describe the authentication capabilities of Azure AD
 - Describe the access management capabilities of Azure AD
 - Describe the identity protection and governance capabilities of Azure AD
- After completing this module, students will be able to:

- Describe basic identity concepts.
- Describe the basic services and identity types of Azure AD
- Describe the authentication capabilities of Azure AD.
- Describe the access management capabilities of Azure AD.
- Describe the identity protection and governance capabilities of Azure AD.

Module 3: Describe the capabilities of Microsoft security solutions

Learn about security capabilities in Microsoft. Topics covered will include network and platform capabilities of Azure, Azure security management, and Sentinel. You'll learn about threat protection with Microsoft 365 Defender and Microsoft 365 security management, and you'll explore endpoint protection with Intune.

Lessons

- Describe the basic security capabilities in Azure
- Describe the security management capabilities of Azure
- Describe the security capabilities of Azure Sentinel
- Describe the threat protection capabilities of Microsoft 365

- Describe the security management capabilities of Microsoft 365
- Describe endpoint security with Microsoft Intune
- Module summary

After completing this module, students will be able to:

- Describe the basic security capabilities in Azure.
- Describe the security management capabilities of Azure.
- Describe the security capabilities of Azure Sentinel.
- Describe the threat protection capabilities of Microsoft 365.
- Describe the security management capabilities of Microsoft 365.
- Describe endpoint security with Microsoft Intune.

Module 4: Describe the capabilities of Microsoft compliance solutions

Learn about compliance solutions in Microsoft. Topics covered will include Compliance center, Information protection and governance in Microsoft 365, Insider Risk, audit, and eDiscovery solutions. Also covered are Azure resources governance capabilities.

Lessons

- Describe the compliance management capabilities in Microsoft
- Describe the information protection and governance capabilities of Microsoft 365
- Describe the insider risk capabilities in Microsoft 365
- Describe the eDiscovery capabilities of Microsoft 365
- Describe the audit capabilities of Microsoft 365
- Describe the resource governance capabilities in Azure

After completing this module, students will be able to:

- Describe the compliance management capabilities in Microsoft.
- Describe the information protection and governance capabilities of Microsoft 365.
- Describe the insider risk capabilities in Microsoft 365.
- Describe the eDiscovery capabilities of Microsoft 365.
- Describe the audit capabilities of Microsoft 365.
- Describe the resource governance capabilities in Azure.
