Description

The Symantec Endpoint Protection 14.x Administration R1 course is designed for the network, IT security, and systems administration professional in a Security Operations position tasked with the day-to-day operation of the SEPM on-premise management console and with configuring optimum security settings for endpoints protected by Endpoint Protection.

Lernziel

By the completion of this course, you will be able to:

- Describe how the Endpoint Protection Manager (SEPM) communicates with clients and make appropriate changes as necessary.
- Design and create Endpoint Protection group structures to meet the needs of your organization.
- Respond to threats using SEPM monitoring and reporting.
- Analyze the content delivery system (LiveUpdate).
- Configure Group Update Providers.
- Create location aware updates.
- Secure endpoints against network and file-based threats
- Control endpoint integrity and compliance
- Enforce an adaptive security posture

Voraussetzungen

This course assumes that students have a basic understanding of advanced computer terminology,

including TCP/IP networking and Internet terms, and an administrator-level knowledge of Microsoft Windows operating systems.

Weiterführende Kurse

Students interested in Administration of Symantec endpoints utilizing the cloud management interface available as part of Symantec Endpoint Security Complete should take the following course:

- Symantec Endpoint Security Complete Administration R1

Test und Zertifizierung

250-428: Administration of Symantec Endpoint Protection 14
