AZ-720T00: Azure Support Engineer Troubleshooting Azure Connectivity

CODE:

MCS_AZ-720T00

LÄNGE:

24 Hours (3 Tage)

PREIS:

Free

Description

Networking is essential, particularly when you have cloud-based assets. This course covers the different connectivity issues that a network engineer will typically encounter, and the troubleshooting steps to resolve these issues.

Zielgruppe

As an Azure network support engineer, you understand that business data is valuable, and needs to be protected from internal and external risks. When you encounter problems with backing up or recovery, you need to know how to approach the problem. In this module, you will learn how to monitor the status of backups, review logs, and troubleshoot common issues that occur when backing up and recovering data.

Voraussetzungen

Before attending this course, students must have:

- Experience with networking and with hybrid environments, including knowledge of routing, permissions, and account limits

Kurstermine
