Description

In this two-day course, you learn how to apply the fundamental techniques for integrating VMware Workspace ONE® Access™ with VMware Workspace ONE® UEM to securely distribute business-critical applications from any device and configure access management controls.

Through a combination of hands-on labs, simulations, and interactive lectures, you configure system and productivity integrations for Workspace ONE Access and Workspace ONE UEM. The course provides the principles of identity and access management.

You will leave with a foundational understanding of how Workspace ONE uses various authentication methods and protocols to determine user access permissions and enable single sign-on.

Objectives

By the end of the course, you should be able to meet the following objectives:

- Explain the general features and functionality that Workspace ONE Access enables
- Demonstrate how to integrate Workspace ONE UEM with Workspace ONE Access
- Summarize and implement Workspace ONE productivity services into the digital workspace environment
- Explain the methods of enabling mobile single sign-on for mobile endpoints managed in the digital workspace
- Configure Workspace ONE Access to support SAML 2.0 for federated authentication across the workforce
