Administering and Configuring IBM Cloud Pak for AIOps v4

CODE:	LENGTH:	PRICE:
TN406G	16 Hours (2 days)	£1,300.00

Description

IBM Cloud Pak for AIOps deploys advanced, explainable AI across the IT Operations (IT Ops) toolchain so that you can confidently assess, diagnose, and resolve incidents across mission-critical workloads. IBM Cloud Pak for AIOps brings the depth and breadth of IBMs enterprise expertise to managing complex, mission-critical IT environments. It helps you apply AI to IT operations to maximize efficiency, reduce costs, and maintain the resiliency and security you need to drive meaningful innovation. This course is designed to teach you how to perform important post-installation administration and configuration tasks for the IBM Cloud Pak for AIOps v4.3 platform, such as user management, troubleshooting, importing topology, enriching event data, configuring self-monitoring, and making runbooks to expedite or automate solutions to IT problems.

Objectives

After completing this course, you should be able to:

- Understand how machine learning applies to IT operations problems
- Explain the IBM Cloud Pak for AIOps architecture
- Understand OpenShift concepts and terminology
- Manage users and groups
- Integrate the IBM Cloud Pak for AIOps console with an LDAP user repository
- Create custom roles
- Troubleshoot your environment
- Monitor your IBM Cloud Pak deployment with the topology service
- View runbook history

Audience

System Administrator, DevOps, Operators, Site Reliability Engineers, Administrators

Programme

Units:

- Unit 1: IBM Cloud Pak for AIOps overview
- Unit 2: Build connections to IBM Cloud Pak for AIOps
- Unit 3. Essential troubleshooting skills
- Unit 4. Configuring self-monitoring
- Unit 5. Temporal, seasonal, and scope-based correlations
- Unit 6. Topology import and event correlation'
- Unit 7. Using runbooks, automations, and policies

Session Dates
