Guardium Data Protection: Uncovering Threats

CODE:	LENGTH:	PRICE:
8G911XG	3.52 Hours	£410.00

Description

IBM Security Guardium provides a broad range of data security and protection capabilities that can protect sensitive and regulated data across environments and platforms. This course provides the foundational level processes, procedures, and practices necessary to locate databases and data, discover vulnerabilities, and automate the compliance process.

Objectives

- Discover databases and sensitive data
- Perform a vulnerability assessment
- Use Guardium audit process tools to streamline the compliance process

Audience

This course is designed for database administrators, security administrators, and security analysts who use Guardium Data Protection.

Prerequisites

Students who participate in this course benefit most when they have the following skills:

- Basic knowledge of risk management, auditing, and compliance
- Familiarity with data protection standards such as HIPAA, PCI, GDPR, and SOX
- Familiarity with the Guardium console and command line interface

Programme

- Guardium discovery & vulnerability assessment
- Audit process automation
