Commvault Engineer – Command Center

CODE:	LENGTH:	PRICE:
COM_CC	24 Hours (3 days)	£1,900.00

Description

Learn how to plan, configure, and deploy Commvault to support your data protection needs with the simplicity and elegance of Commvault's Command Center. Start with an overview of the CommCell environment and architecture and data indexing processes as essential components for effective backup and recovery. You will then learn about options for storage design for single and hybrid recovery types, how data marked and stored, how to leverage deduplication to scale effectively, and how to configure and manage plans to avoid overloading your bandwidth. The next topics cover the
protection of virtual environments and applications, followed by IntelliSnap technology to support fast and effective backups. The course concludes with guidance on performance management.

	Delivery Methods	
	• Instructor-led (Available in some EMEA countries)	Duration
Highlights	• Virtual Instructor-led	• Three-day Instructor and Virtual Instructor-led

Audience

Who should take this course?
• Experienced Commvault users who are responsible for design and architecting data protection solutions
• Systems engineers and architects responsible for designing, implementing, and managing one or more Commvault environments
• Security officers responsible for strategically planning data protection with Commvault

Test and Certification

Completion of this course helps you prepare for the Commvault Engineer – Command Center Exam Certification. The Commvault Certified Engineer –Command Center is included free of charge as a part of the Commvault Engineer – Command Center instructor and virtual instructor-led course registration. To achieve Commvault Engineer – Command Center Certification you must first complete the Commvault Professional Certification.
