omnissa™ **Workspace ONE UEM Operations**

CODE:	**LENGTH:**	**PRICE:**
OMN_WS1SUEM22	40 Hours (5 days)	£4,250.00

Description

The Workspace ONE UEM Operations course will enable you use the features of Workspace ONE UEM to manage endpoints, create security configurations, enable proactive compliance actions and troubleshoot enterprise systems and endpoints.

The Workspace ONE UEM Operations course is designed to provide IT professionals, system administrators, and mobility operations teams with the knowledge and practical skills needed to efficiently manage, monitor, and optimize VMware Workspace ONE Unified Endpoint Management (UEM). This course focuses on operational workflows, troubleshooting, and best practices for maintaining a robust and efficient UEM environment.

Objectives

Participants will gain a deep understanding of day-to-day administrative tasks, advanced features, and tools available in Workspace ONE UEM to ensure the smooth management of devices across different platforms.
 By the end of this session, attendees should be able to:
• Understand the core components and architecture of Workspace ONE UEM.
• Perform day-to-day administrative tasks and operations.
• Monitor and troubleshoot issues using Workspace ONE UEM tools and logs
• Optimize device management across iOS, Android, Windows, and macOS platforms.
• Manage applications, content, and policies to ensure compliance and security.
• Leverage Workspace ONE UEM reporting and analytics for operational insights.
• Implement best practices to streamline UEM operations and enhance user experience.
• Utilize a variety of use cases to assist with building out a security policies for a company production UEM environment

Audience

• Systems Engineers • Consulting Architects • Microsoft End-User Computing Specialists

Prerequisites

Recommended: Completion of Workspace ONE UEM Administration Familiarity with general IT concepts, including device management, networking, and security.
