Description

The *Symantec Edge SWG Administration R3* course provides a detailed introduction to the use cases, features, and benefits of Edge SWG.

Objectives

By the completion of this course, you will be able to:

- Describe the major Edge SWG functions and capabilities
- Write policies to defend enterprise networks against malware attacks and to enforce acceptable Internet browsing behavior
- Understand how the various applications work together to secure enterprise networks

Prerequisites

- Basic understanding of networking concepts
- Basic understanding of network security concepts
- Basic understanding of the use of proxy servers

Programme

Module 1: Introduction to Symantec Edge SWG

- Symantec Edge SWG overview
- Introduction to the Edge SWG Admin Console
- Key Edge SWG use cases

Module 2: Intercepting traffic and applying policy

- How Edge SWG intercepts traffic
- Writing Edge SWG policy in the Visual Policy Manager
- Informing users when web access is denied or restricted due to policy
- Best practices to avoid troubleshooting issues related to policy

Module 3: Applying security and web usage policy to encrypted traffic

- Introduction to TLS encryption
- Managing HTTPS traffic on Edge SWG
- Offloading HTTPS traffic to the SSL Visibility Appliance to boost performance
- Best practices to avoid troubleshooting issues related to SSL interception

Module 4: Providing security and web usage policies based on role or group

- Authentication basics on Edge SWG
- Using IWA authentication on Edge SWG
- Authentication modes in explicit and transparent proxy deployments
- Connecting to the Windows domain directly using IWA direct
- Connecting to the Windows domain using IWA BCAA
- Introduction to role-based access control
- Using roles and groups in policy
- Best practices to avoid troubleshooting issues related to authentication

Module 5: Enforcing corporate guidelines for acceptable Internet browsing behavior

- Creating strong corporate guidelines for acceptable Internet use
- Using website categorization to enforce acceptable use guidelines
- Providing Edge SWG with categorization databases to be referenced in policy
- Setting the Request URL Category object in policy to enforce acceptable use guidelines
- Applying policy in order to enforce acceptable use guidelines
- Best practices to avoid troubleshooting issues related to enforcing acceptable use guidelines

Module 6: Protecting the endpoint from malicious activity

- Requirements for a pre-emptive, layered web defense
- WebPulse technical details
- Introduction to Intelligence Services
- Using Intelligence Services data feeds in policy
- Ensuring safe downloads
- Combined policy example
- Best practices to avoid troubleshooting issues related to protecting the endpoint from malicious activity

Module 7: Using built-in diagnostic tools on Edge SWG

- Key sources of information
- Sending service information to Symantec support

Module 8: Edge SWG integrations

- Centrally managing devices with Management Center
- Enhancing security with virus scanning
- Providing security for risky and unknown websites with High Risk Isolation
- Introduction to Cloud SWG
- Reporting on Edge SWG activity

Module 9: Course review

- Symantec Edge SWG Administration R3 course review

Appendix A: Overview of the SSP hardware platform and Integrated Secure Gateway (ISG)

Appendix B: Understanding SGOS architecture and caching on Edge SWG

Appendix C: Introduction to Content Policy Language (CPL)

Test and Certification

The *Symantec Edge SWG R3 Technical Specialist* certification exam accompanies this course.
