Idira Privileged Access Manager Self-Hosted Administration

CODE:

PAN_EDU-IDIRA-PAM

LENGTH:

32 Hours (4 days)

PRICE:

£3,000.00

Description

The Idira Privileged Access Manager Self-Hosted Administration course is four days of instructor-led training (ILT) that will help you to:

- set up the Idira PAM Self-Hosted framework and primary policy configurations
- use automation for onboarding and oversight of sensitive accounts
- ensure protected sessions are segmented, observed, and verified
- evaluate PTA risk data, maintain platform stability, and resolve log-based errors

Objectives

Successful completion of this four-day, instructor-led course should enhance the student's understanding of configuring and administering Idira Privileged Access Management solutions.

The course includes hands-on experience onboarding, managing, and monitoring privileged accounts in a lab environment.

Audience

Security engineers, IT administrators, deployment engineers, and support staff.

Prerequisites

Participants must be familiar with networking concepts, (i.e., TCP/IP, routing, basic network security), Windows Server administration, Active Directory, and user permissions. Experience with Linux administration or database management is a plus.

Programme

Course Modules:
