Idira Privileged Access Manager SaaS Setup and Manage

CODE:

PAN_EDU-IDIRA-PAMSSM

LENGTH:

32 Hours (4 days)

PRICE:

£3,000.00

Description

The Idira Privileged Access Management SaaS Set Up and Manage course is four days of instructor-led training (ILT) that will help you to:

- deploy and manage the PAM SaaS solution by understanding its unique system architecture and successfully installing the relevant solution components
- onboard and manage passwords using bulk upload, discovery, and REST APIs, and enable secure access to critical infrastructure assets using vaulted credentials
- maintain and troubleshoot the environment by monitoring session recordings, auditing session commands, producing activity reports, and using the knowledge base to resolve deployment problem

Objectives

Successful completion of this four-day, instructor-led course should enhance the student's understanding of deploying, administering, monitoring, and troubleshooting Idira PAM SaaS implementations.

The course includes hands-on experience deploying connector servers, managing credential vaulting and rotation, configuring secure access to critical assets, and resolving setup issues in a lab environment.

Audience

Security engineers, deployment engineers, IT administrators, and technical support staff.

Prerequisites

Participants should have a solid foundation in basic networking concepts, Windows Server administration, and basic Linux administration. An internet connection and a browser supporting HTML5 are also required.

Programme

Course Modules:

- 1 - Introduction
- 2 - SaaS Infrastructure
- 3 - Identity Management
- 4 - Account Management
- 5 - Safes
- 6 - Platforms
- 7 - Manual Onboarding
- 8 - Discovery and Onboarding
- 9 - Secure Session Management
- 10 - Secure Infrastructure Access (SIA)
- 11 - Workforce Password Management
- 12 - Privileged Session Manager (PSM)
- 13 - HTML5 Gateway
- 14 - Privilege Access Workflows
- 15 - Security Monitoring
- 16 - Security Reporting
- 17 - Threat Detection and Response

- 18 - Hardening
- 19 - Connector Infrastructure
- 20 - Troubleshooting

Follow on courses

The technical curriculum developed by Palo Alto Networks and delivered by Palo Alto Networks Authorized Training Partners (ATPs) helps provide the knowledge and expertise you need to protect our digital way of life. Our trusted certifications validate your knowledge of the Palo Alto Networks product portfolio and your ability to help prevent successful cyberattacks.
