JUN_AJER	40 Hours (5 days)	£3,495.00

Description

This five-day course is designed to provide students with the tools and methods required for implementing, monitoring, and troubleshooting Layer 3 components in an enterprise network. This course covers OSPF, BGP, multicast, enterprise architecture, and Ethernet VPN-Virtual Extensible LAN (EVPN-VXLAN) is covered in depth. The course also exposes students to common troubleshooting commands and tools used to diagnose various intermediate to advanced issues. Through demonstrations and hands-on labs, students will gain experience with features of each of these devices, vSRX virtual firewalls and vQFX virtual switches. This course is based on Junos OS Release 22.1R1.10.

Course Level
Advanced Junos Enterprise Routing (AJER) is an advanced-level course.

Objectives

- Describe OSPFv2 concepts.
- Describe OSPF operations.
- Describe and configure OSPF area types and operations.
- Configure OSPF areas through summarization and restrictions.
- Utilize commands to troubleshoot and verify OSPF operations.
- Analyze different OSPF issues.
- Describe BGP operations.
- Describe and configure the BGP route selection process.
- Explain the use of routing policies in BGP.
- Describe BGP attributes and their usages.
- Describe and configure BGP communities.
- Describe BGP troubleshooting.
- Explain how routing policies are used in an enterprise network.
- Reduce problems related to routing policy structure and configuration.
- Identify commands for troubleshooting routing policy.
- Explain the fundamentals of multicast routing.
- Describe and configure Internet Group Management Protocol (IGMP).
- Describe Protocol Independent Multicast (PIM).
- Configure PIM.
- Describe and configure route reflection.
- Explain enterprise networking.
- Describe the key concepts of Evolved core and Layer 3 based campus designs.
- Explain the benefits of VXLAN.
- Explain why you would use EVPN-VXLAN in a campus network.
- Describe and configure an Evolved Campus Core (ECC) network.
- Describe and configure a distribution and access network.
- Describe Ethernet Virtual Private Network (EVPN) route types.
- Describe EVPN troubleshooting.

Audience

Individuals responsible for configuring and monitoring devices running the Junos OS

Prerequisites

- Familiarity with the Junos Operating System (OS)
- Basic understanding of the Open Systems Interconnection model
- Knowledge of basic routing and switching principles
- Experience configuring and monitoring the TCP/IP protocol suite
- Basic understanding of firewall filters

Programme

Day 1

Course Introduction

OSPF—Part 1

- Describe OSPFv2 operations
- Differentiate link-state advertisements

OSPF—Part 2

- Distinguish protocol operations
- Explain OSPF authentication
- Apply OSPFv3

Lab: Configuring and Monitoring OSPF

OSPF Areas—Part 1

- Identify OSPF areas
- Describe stub area operations
- Add a stub area configuration

OSPF Areas—Part 2

- Explain NSSA operation
- Add an NSSA configuration
- Explain route summarization

Lab: OSPF Route Summarization

Advanced OSPF Options

- Explain NSSA operation
- Generate a NSSA configuration
- Explain route summarization

Advanced OSPF Case Studies

- Interpret external reachability case studies

Lab: Configuring Advanced OSPF Options

Day 2

Troubleshooting OSPF

- Perform troubleshooting and verification of OSPF adjacencies
- Perform troubleshooting and verification of OSPF consistencies

Troubleshooting OSPF Routing Issues

- Conduct troubleshooting and verification of OSPF routing

Lab: Troubleshooting OSPF

BGP—Part 1

- Explain BGP concepts
- Describe BGP configuration options

BGP—Part 2

- Explain BGP route options
- Describe BGP path selection

Lab: Implementing BGP

BGP Attributes and Policy

- Explain BGP route processing
- Describe BGP Attributes

Common BGP Attributes

- Describe and configure common BGP attributes

BGP Communities

- Configure BGP communities
- Explain how to use regular expressions with BGP communities
- Examine a BGP community use case

Lab: BGP Attributes

Troubleshooting BGP

- Examine IBGP and EBGP troubleshooting

BGP Troubleshooting Case Study

- Examine troubleshooting BGP neighbor issues

Lab: Troubleshooting BGP

Day 3

Enterprise Routing Policies—Part 1

- Review an enterprise routing policy use case

Enterprise Routing Policies–Part 2

- Examine enterprise external network deployment

Lab: Implementing Enterprise Routing Policies

Troubleshooting Policies–Part 1

- Examine routing policy structure
- Describe regular expression matching with routing policies
- Examine routing policy troubleshooting methods

Troubleshooting Policies–Part 2

- Examine the routing policy troubleshooting command usage
- Review a routing policy use case

Lab: Troubleshooting Routing Policy

Introduction to Multicast–Part 1

- Describe IP multicast traffic flow and multicast components
- Describe multicast addressing
- Describe the need for RPF check in multicast networks
- Describe multicast routing tables

Introduction to Multicast–Part 2

- Explain the role of IGMP
- Describe the different versions of IGMP
- Configure and monitor IGMP

Day 4

Multicast Operations–Part 1

- Describe PIM sparse mode operation

Lab: Implementing PIM-SM

Multicast Operations–Part 2

- Configure and monitor PIM sparse mode
- Configure and monitor RP discovery mechanisms

Lab: Implementing SSM

BGP Route Reflection

- Describe the operation of BGP route reflection
- Configure a route reflector

Lab: BGP Route Reflection

Enterprise Architectures–Part 1

- Describe traditional enterprise networks
- Examine new enterprise networking methods

Enterprise Architectures–Part 2

- Examine EVPN-VXLAN enterprise networks
- Examine new enterprise networking methods

VXLAN Overview

- Describe Layer 2 tunneling
- Explain VXLAN functionality
- Describe VXLAN gateways

Day 5

EVPN-VXLAN Architecture

- Describe EVPN features
- Describe EVPN operations
- Describe EVPN with VXLAN for data plane encapsulation

Configuring EVPN-VXLAN Networks–Part 1

- Examine a case study
- Configure an underlay network
- Configure an overlay network
- Verify an ECC network

Configuring EVPN-VXLAN Networks–Part 2

- Add leaf nodes to an ECC network
- Build a full fabric EVPN-VXLAN network

Lab: Configuring an EVPN-VXLAN Network

Verifying and Troubleshooting EVPN-VXLAN Architecture–Part 1

- Explain EVPN route identification

Verifying and Troubleshooting EVPN-VXLAN Architecture–Part 2

- Explain EVPN troubleshooting commands

Recommended Next Course:

JNCIE-ENT Bootcamp

Test and Certification

Associated Certification

JNCIP-ENT exam topics are based on the content of the recommended instructor-led training courses, as well as the additional resources.

- Exam code: JN0-649
- Written exam
- Administered by Pearson VUE
- Exam length: 120 minutes
- Exam type: 65 multiple-choice questions
- Pass/fail status is available immediately
- Junos OS 21.2

The JNCIP-ENT certification is valid for three years.

Exams can be purchased and scheduled at
