Description

This two-day hands-on training course provides advanced knowledge, skills, and tools to achieve competency in operating VMware vRealize® Operations™ 8.X. This course explains the design and creation of advanced dashboards, capacity concepts, and the REST API with real-world use cases.

Objectives

By the end of the course, you should be able to meet the following objectives:

- Use the applications to group objects
- Create the logical groups of objects in the vRealize Operations environment
- Create and design advanced dashboards
- Discuss about widget and its settings
- Define a vRealize Operations policy
- Outline the components of a vRealize Operations policy
- Create the custom alerts
- Describe the troubleshooting workbench
- Review the advanced capacity concepts
- Discuss the what-if analysis scenarios
- Describe how to integrate vRealize Operations with VMware vRealize® Suite products
- Import the VMware vRealize® Network Insight™ applications
- Describe the super metrics use cases
- Outline the vRealize Operations REST API architecture
- Discuss the vRealize Operations traversal spec
- Create and query objects using the REST API

Programme

- | | |
|--|---|
| 1 Course Introduction | 2 Custom Groups and Applications |
| • Introduction and course logistics | • Outline the use cases for custom groups |
| • Course objectives | • Create the custom groups |
| 3 Custom Dashboard Design | • Assign the objects to custom groups |
| • Design the dashboards | • Identify the use cases for applications |
| • Discuss the types of widgets and widget's settings | • Create the custom applications |
| • Select the widgets based on the scenario | • Identify the vRealize Network Insight applications |
| • Explain the advanced dashboards | 4 Custom Policies |
| • Discuss the use cases of dashboards | • Outline the components of a vRealize Operations policy |
| 5 Alerts, Symptoms and Troubleshooting workbench | • Review the policies applied to the objects in vRealize Operations |
| • Identify the use case for custom alerts and symptoms | • Outline how the policy hierarchy is implemented |
| • Create the custom alerts and symptoms | • Design a vRealize Operations Policy |
| • Access the troubleshooting workbench feature | • Understand how a policy supports the business objectives |
| • Use the troubleshooting workbench feature to identify problems | 6 Capacity Models and What-if Scenarios |
| • Outline the metric correlation options in vRealize Operations | • Review the capacity planning concepts |
| | • Describe the demand based and allocation-based model |
| | • Discuss the use cases of capacity models |
| | • Discuss the use cases of what-if analysis scenarios |

7 vRealize Operations integration

- Integrate vRealize Operations with products in vRealize Suite
- Identify the advantages of integrating vRealize Operations with vRealize Log Insight
- Import the vRealize Network Insight applications
- Configure the integration with vRealize Automation

9 vRealize Operations REST API

- Outline the REST API architecture
- Navigate the REST API landing page
- Discuss the Swagger response codes
- Explain the vRealize Operations traversal specification
- Create and query objects using the REST API
- Discuss some of the examples of the REST API

8 Super Metrics

- Create super metrics
- Explain the depth value
- Discuss the use cases of super metrics

Session Dates
