Horizon Advanced Integrations

CODE:	LENGTH:	PRICE:
OMN_EUCD	40 Hours (5 days)	€4,995.00

Description

Delivered by the Technical Specialists in the Omnissa Enablement and Learning team, the Horizon Advanced Integrations course is solutions focused. In this session, we demonstrate why and how we use Workspace ONE with Horizon to help solve business challenges.

Course Overview

The primary objective of this session is to demonstrate the world's leading End-User Computing (EUC) product stack and its solutions-focused approach to solving business challenges.

Course Duration Five (5) days of instructor-led classroom training

Objectives

As a solution-focused offering, we start with an already deployed multi-site Horizon environment.

Our focus is on how Workspace ONE with Horizon can help solve business challenges from a manageability, security, availability, recoverability, and performance perspective.

The philosophy at the heart of Workspace ONE is the end-user experience: simple yet secure, regardless of the endpoint platform. By the end of this session, attendees should be able to:

- Integrate Horizon with Horizon Cloud NEXT GEN.

- Deploy the Unified Access Gateway, with their own developed PowerShell Script.
- Configure a seamless multi-site access solution with NSX Advanced Load-balancer using Global Server Load balancing and Local Server Load balancing.
- Configure Horizon Cloud Pod Architecture to solve high availability and scalability requirements.
- Configure a secure Single Sign-On solution using Workspace ONE Access and secured endpoints using Workspace ONE UEM.
- Integrating Horizon with OPSWAT.
- Integrate with untrusted Active Directory Forests to provide secure resources when organizations are isolated.
- Deploy Apps-on-Demand with a view to maintaining redundancy and enhancing manageability in a multi-site Enterprise.
- Facilitate and manage the end-user experience for Microsoft Windows Users using Dynamic Environment Manager.
- Integrate with ThinApp to help with legacy application and platform challenges.

Audience

- Systems Engineers • Consulting Architects • Citrix Specialists (who would like to upskill on Workspace ONE with Horizon)
- Microsoft End-User Computing Specialists

Prerequisites

Recommended:

- Omnissa Certified Professional Desktop (OCPD)
- Having a base understanding of Horizon is beneficial.

- A background in End-User Computing is recommended. Additional platform knowledge of vSphere is advantageous.

Further Information

TECHNICAL REQUIREMENTS

- Bring a full-size laptop.

- A secondary device is recommended for reading and lab materials, which are only delivered electronically.
- Please ensure you have the US keyboard mapping added to your devices
