# Building Splunk Classic Apps

CODE:	LENGTH:	PRICE:
SPL_BSA	16 Hours (2 days)	€1,560.00

## Description

This course focuses on Splunk app and add-on development. It's designed for application developers who want to create new apps for Splunk Enterprise and Splunk Cloud. Major topics include planning apps, building a data generator, creating custom search commands and REST endpoints, app packaging and deployment, and more.

## Objectives

- Plan, build, and manage Splunk apps
- Create a data generator
- Develop a custom search command
- Extend the Splunk REST API
- Construct a workflow action
- Validate an app with AppInspect
- Package and deploy an app

## Audience

Application developers

## Programme

### Topic 1 – Planning Apps

- Describe apps and add-ons
- Set up a development environment
- Improve app performance
- Use security best practices

### Topic 2 – Adding Data

- List types of data inputs
- Explain modular vs scripted inputs
- Review types of knowledge objects
- Create a data generator

### Topic 3 – Creating Apps

- Create a basic app
- Configure app properties
- Identify app components
- Manage apps and add-ons

### Topic 4 – Custom Search Commands

- Identify search command types
- Create a search command
- Examine Splunk metadata
- Configure access control

### Topic 5 – Custom REST Endpoints

- Identify REST handler types
- Create a REST endpoint
- Examine Splunk metadata
- Configure access control

### Topic 6 – Custom Workflow Actions

- Identify workflow action types
- Create a workflow action
- Examine workflow action parameters

- Configure access control
- Topic 7 – Packaging Apps
- Create an app setup page
  - Explain config file precedence
  - Use AppInspect to validate an app
  - Produce a deployable app
