Managing ModelOps with IBM Cloud Pak for Data V4.8

CÓDIGO:	DURACIÓN:	Precio:
6XL936G	7.04 Hours (0.88 días)	A consultar

Description

This learning offering tells a comprehensive story of Cloud Pak for Data, and how you can extend the functions with services and integrations. You explore some of the services, and see how they enable effective collaboration across an organization. In this course, you use IBM Knowledge Catalog, Watson Query, and Watson Studio (including Data Refinery and AutoAI). You also examine some of the industry accelerators that are available on the platform.

Objetivos

After completing this course, you should be able to:

- Describe the Cloud Pak for Data implementation stack
- Summarize the Cloud Pak for Data workflow that implements the ModelOps process
- Construct a simple predictive model that reflects a typical Data Fabric solution
- Examine industry accelerators that promote trustworthy AI
- Select services that align to the goals of data-driven organizations

Público

Architect, Consultant, Data Specialist, Program Management

Requisitos Previos

Before you start this course, you should be able to complete the following tasks:

- Explain the purpose of Cloud Pak for Data and the value it brings to the business
- Describe the architecture of Cloud Pak for Data
- Differentiate between Cloud Pak for Data and Red Hat OpenShift Container Platform
- Define the AI Ladder and its associated roles and services

You can review these skills in the Solution Architect � Associate learning path.

Programa

- Introduction
- Explore the Cloud Pak for Data environment
- Create a project for analyzing data
- Collect the data
- Govern the data
- Prepare the data
- Analyze the data
- Monitor the model
- Consider other scenarios
- Review and evaluation
