# IBM FlashSystem 9200 Implementation

<b>CÓDIGO:</b>	<b>DURACIÓN:</b>	<b>Precio:</b>
ZL1_SSFS7D	6 Hours	€130.00

## Description

IBM FlashSystem 9200 system is an all-flash, powerful end-to-end Non-Volatile Memory Express (NVMe) enterprise storage solution that combines the performance of IBM FlashCore technology, the ultra-low latency of Storage Class Memory (SCM), the rich features of IBM Spectrum Virtualize, and AI predictive storage management to provide intensive, data driven multi-cloud storage for the most critical demands.

This course introduces the IBM FlashSystem 9200 control enclosures, 9846/9848 AG8 and UG8, and the IBM FlashSystem expansion enclosures, 9846/9848 AFF and A9F. It also focuses on FlashCore Technology, scalability, and RAID protection solutions.

## Objetivos

- Recall the history and fundamentals of the IBM Flash System storage
- Categorize the capabilities of the features of IBM Spectrum Virtualize with the IBM FlashSystem 9200
- Summarize the architecture of the IBM FlashSystem 9200
- Identify the various elements of FlashSystem 9200 Scale Up/Scale Out Solutions
- List the requirements that support intermixing cluster solutions

## Público

Enrollment in this course is not restricted. Typical students may include: Customers Technical IBM personnel Business Partner technical personnel IT consultants and architects

## Programa

- Evolution of FlashSystems
- IBM Spectrum Virtualize: Improving Storage Efficiency
- IBM FlashSystem 9200 Architecture overview
- IBM FlashCore Technology
- IBM FlashSystem 9200 SAS-Attached Flash storage
- Scale up and scale out solutions
- RAID protection solutions

## Fechas Programadas

Fecha	Localización	Zona horaria	Idioma	Modalidad de impartición	Impartición garantizada	Precio
24 Nov 2024			English	Web based Training		€260.00

## Información Adicional

[Esta formación también está disponible en modalidad presencial. Por favor contáctenos para más información.](#)
