Description

HCIP-R&S-IEEP Training V2.5

Describe how to plan and design network. Introduce the project implementation process and engineer service specifications. Describe the contents and methods of network routine maintenance, the core ideas and methods of structured network troubleshooting process and troubleshooting.

Objetivos

Upon completion of this course, students can have a comprehensive and in-depth understanding of small and medium-sized networks, acquire common technologies for small and medium-sized networks, and independently design small and medium-sized networks and implement the design using Huawei switching equipment.

Programa

1. Network Planning
 - 1.1 Network Planning
2. Network Design
 - 2.1 Network Design
3. Network Implementation
 - 3.1 Network Implementation
4. Network Maintenance
 - 4.1 Network Maintenance
5. Network Troubleshooting Overview
 - 5.1 Network Troubleshooting Overview
6. Troubleshooting
 - 6.1 Troubleshooting Common Network Faults
7. Network Troubleshooting Scenario Cases
 - 7.1 Network Troubleshooting Scenario Cases
8. Network Optimization
 - 8.1 Network Optimization
9. Network Migration
 - 9.1 Network Migration
