# Preparing for Red Hat OpenShift: Implementing Containers on IBM Power Systems

<b>CÓDIGO:</b>	<b>DURACIÓN:</b>	<b>Precio:</b>
LX063G	16 Hours (2 días)	€1,100.00

## Description

This 2 day course is designed to provide skills enablement for system administrators and product support specialists in the area of operating system based virtualization provided by Linux containers. Topics include introduction to Podman, Buildah, Docker, Kubernetes and CRI-O. Hands-on exercises reinforce the lecture material, allowing students to install and configure Linux containers.

## Objetivos

After completing this course, you should be able to:

- Describe Linux containers architecture
- Install and configure Docker onto a Power Systems environment
- Perform Docker administration operations
- Install and configure CRI-O
- Perform basic container orchestration steps

## Público

This course is for anyone that needs to build experience with operating system based virtualization using Docker. The audience for this training includes the following:

Cloud administrators  
POWER technical support individuals  
POWER system administrators  
POWER system engineers  
POWER system architects

## Requisitos Previos

Basic Linux skills  
Basic PowerVM skills

## Programa

Unit 1: Introduction to containers  
Exercise 1: Accessing lab environment  
Unit 2: Implementing containers on IBM Power Systems  
Exercise 2: podman installation  
Unit 3: Container operations  
Exercise 3: Managing containers and images  
Unit 4: Container orchestration  
Exercise 4: Managing storage and networking

## Fechas Programadas

A petición. Gracias por [contactarnos](#).
