Description

The Commvault® Master Class and Certification is designed to educate and validate the deepest level of knowledge attainable for Commvault administrators and engineers. Knowledge gained can be applied in advanced enterprise architecture, complex troubleshooting, and more comprehensive management of day-to-day activities. Training emphasis is placed on a concentrated understanding of advanced Commvault features including: virtualization, deduplication, snapshot management, backup/archiving, retention, application protection, and troubleshooting. Master certification assesses knowledge acquired from the master class, validates the mastery of Commvault technologies, and allows those few who complete the program to stand apart from others in the industry.

Fechas Programadas

A petición. Gracias por [contactarnos](#).
