# IBM Spectrum Virtualize - Transparent Cloud Tiering

<b>CÓDIGO:</b>	<b>DURACIÓN:</b>	<b>Precio:</b>
SNV10CDG	4 Hours	€447.00

## Description

IBM Spectrum Virtualize Transparent Cloud Tiering supports creating connections to cloud service providers to store copies of volume data in private or public cloud storage  freeing up capacity on the system.

This module discusses how transparent cloud tiering features and functions, and how it can help administrators to create point-in-time snapshots of data on the system and then copied and stored on the cloud storage. Thus allowing administrators to restore snapshots from the cloud for disaster recovery purposes.

You will also authenticate Transparent Cloud Tiering on an IBM Spectrum Virtualize system to an OpenStack cloud server, create a cloud snapshot of a volume, and recover the volume snapshot from the cloud.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the Self-Paced Virtual Classes and Web-Based Training Classes on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course. <http://www.ibm.com/training/terms>

## Objetivos

Upon completion of this course you should be able to: Define hybrid cloud storage Identify the attributes of transparent cloud tiering Characterize the function of the cloud snapshot Characterize the function of the cloud snapshot recovery Assess the use cases of cloud storage

## Requisitos Previos

IBM Spectrum Virtualize for the IBM SAN Volume Controller (SNV10G)

## Fechas Programadas

Fecha	Localización	Zona horaria	Idioma	Modalidad de impartición	Impartición garantizada	Precio
21 Nov 2024			English	Web based Training		€260.00

## Información Adicional

Esta formación también está disponible en modalidad presencial. Por favor contáctenos para más información.
