Description

This 18-hour course is designed for administrators who are responsible for getting data into Splunk Indexers. The course provides the fundamental knowledge of Splunk forwarders and methods to get remote data into Splunk indexers. It covers installation, configuration, management, monitoring, and troubleshooting of Splunk forwarders and Splunk Deployment Server components

Objetivos

Description

- Understand sourcetypes
- Manage and deploy forwarders
- Configure data inputs
- Fire monitors
- Network inputs (TCP/UDP)
- Scripted inputs
- HTTP inputs (via the HTTP Event Collector)
- Customize the input phase parsing process
- Define transformations to modify data before indexing
- Define search time knowledge object configurations

Requisitos Previos

To be successful, students should have a solid understanding of the following courses:

- What Is Splunk?
- Intro to Splunk
- Using Fields
- Introduction to Knowledge Objects
- Creating Knowledge Objects
- Creating Field Extractions

OR the following courses:

- Splunk Fundamentals 1
- Splunk Fundamentals 2 (recommended)

Students should also have understand the following course:

- Splunk Enterprise System Administration (recommended)

Programa

Module 1 - Getting Data Into Splunk

Provide an overview of Splunk

Describe the Splunk distributed model

Describe data input types and metadata settings

Configure initial input testing with Splunk Web

Testing indexes with Input Staging

Module 2 - Configuration Files and Apps

Identify Splunk configuration files and directories
Describe index-time and search-time precedence
Validate and update configuration files
Explore Splunk apps and app installation

Module 3 - Configuring Forwarders

Configure Universal Forwarders
Configure Heavy Forwarders

Module 4 - Customizing Forwarders

Configure intermediate forwarders
Identify additional forwarder options

Module 5 - Managing Forwarders

Describe Splunk Deployment Server (DS)
Manage forwarders using deployment apps
Configure deployment clients and client groups
Monitor forwarder management activities

Module 6 - Monitor Inputs

Create file and directory monitor inputs
Use optional settings for monitor inputs
Deploy a remote monitor input

Module 7 - Network Inputs

Create network (TCP and UDP) inputs
Describe optional settings for network inputs

Module 8 - Scripted Inputs

Create a basic scripted input

Module 9 - Agentless Inputs

Configure Splunk HTTP Event Collector (HEC) agentless input
Describe Splunk App for Stream

Module 10 - Operating System Inputs

Identify Linux-specific inputs
Identify Windows-specific inputs

Module 11 - Fine-tuning Inputs

Understand the default processing that occurs during input phase
Configure input phase options, such as source type fine-tuning and character set encoding

Module 12 - Parsing Phase and Data Preview

Understand the default processing that occurs during parsing
Optimize and configure event line breaking
Explain how timestamps and time zones are extracted or assigned to events
Use Data Preview to validate event creation during parsing phase

Module 13 - Manipulating Input Data

Explore Splunk transformation methods
Create rulesets with Ingest Actions
Mask data with Ingest Actions rules
Mask data with SEDCMD and TRANSFORMS

Module 14 - Routing Input Data

Filter data with Ingest Action rules
Route data with Ingest Action rules
Route data with Transforms
Override sourcetype or host based upon event values

Module 15 - Supporting Knowledge Objects

Define default and custom search time field extractions
Identify the pros and cons of indexed time field extractions
Configure indexed field extractions
Describe default search time extractions
Manage orphaned knowledge objects

Fechas Programadas

A petición. Gracias por contactarnos.

Información Adicional

Esta formación también está disponible en modalidad presencial. Por favor contáctenos para más información.
