NEP_PROTSQL	16 Hours (2 días)	€1,900.00

## Description

This course covers the deployment of the SnapCenter Plug-in for Microsoft SQL Server. In this course, you learn about the features of the plug-in and how to install and perform initial configuration of the plug-in. You learn how to protect, clone, and restore Microsoft SQL Server databases by using SnapCenter software. Through instructor-led presentations, you gain knowledge about these topics. Hands-on exercises provide you with experience in performing these tasks.

## Objetivos

- Describe the features of the Microsoft SQL Server Plug-in
- List the workflow for using SnapCenter software to protect Microsoft SQL Server databases
- Explain how SnapCenter software uses NetApp technology to protect SQL Server databases
- Illustrate the recommended NetApp storage layouts to support SQL Server data
- Describe data protection strategies for SQL Server databases by using SnapCenter software
- Demonstrate how to configure and perform SQL Server database backups by using SnapCenter software
- Demonstrate SQL Server database restores that use SnapCenter software
- Describe cloning strategies that use SnapCenter software and NetApp technology
- Build alerting and reporting operations for Plug-in for SQL Server

## Público

- NetApp and NetApp Partner Professional Services
- Systems Engineers
- NetApp Customers

## Requisitos Previos

The following 5 day instructor led class is required.. [\*\*OT-CLU-DPA - ONTAP Cluster Administration and Data Protection\*\*](#)  
In addition to the following 3 day instructor led class.. [\*\*SNAP-C-ADM - NetApp SnapCenter Administration\*\*](#)  
The SnapCenter Fundamentals free of charge elearning is also required which can be accessed directly from the NetApp Learning Centre. Please contact us for further help as required  
[\*\*Contact Us\*\*](#)

## Programa

### Module 1: SnapCenter Plug-In for Microsoft SQL Server Overview

- Features
- MS SQL server data protection workflow

### Module 2: Getting Started with the SnapCenter Plug-In for MS SQL Server

- Prerequisite tasks for using the Plug-In
- Installation steps for the Plug-in
- Plug-in configuration
- Storage layout recommendations and restrictions
- Storage design for a virtualized environment

### **Module 3: Data Migration**

- Resource wizard
  - Importing from SnapManager software
- ### **Module 4: Creating and Backing up SQL Server Resources**

- Data protection strategy
  - Backing up SQL server databases
- ### **Module 5: Restoring SQL Server Resources**

- Defining a restore strategy
  - Restoring SQL server databases
- ### **Module 6: Cloning SQL Server Databases**

- Defining a cloning strategy
  - Cloning a SQL server database backup
  - Splitting a SQL server cloned database
  - Clone lifecycle management
- ### **Module 7: Monitoring and Managing SQL Server Operations**

- Monitoring operations
  - Canceling a database backup operation
  - Monitoring and managing a thin-provisioned environment
  - Setting thresholds, alerts and reports
- ### **Labs:**

- Configuring SnapCenter and install plug-ins for MS SQL Server
  - Migrating databases
  - Protecting a MS SQL server database
  - Restoring a MS SQL server database
  - Cloning a MS SQL server database
  - Performing management and monitoring tasks by using SnapCenter software and NetApp ONTAP system manager
- ### **Appendix A - Challenge labs:**

- Migrating a database from existing volume to a new volume
- Configuring backup and replication for the newly migrated database
- Configuring a clone lifecycle for the development team

- Performing a point-in-time restore to remove database corruption

## Fechas Programadas

Fecha	Localización	Zona horaria	Idioma	Modalidad de impartición	Impartición garantizada	Precio
09 Dec 2024	Virtual Classroom	CET	English	Classroom		€1,900.00

## Información Adicional

[Esta formación también está disponible en modalidad presencial. Por favor contáctenos para más información.](#)
