FortiSOAR Administrator

CÓDIGO:	DURACIÓN:	Precio:
FNT_FT-FSR-ADM	16 Hours (2 días)	A consultar

Description

In this course, you will learn about FortiSOAR architecture, and how to deploy, configure, manage, operate, and monitor FortiSOAR in a SoC environment. You will learn about various system customization options, HA deployment, security management using role-based access control (RBAC), and various system monitoring tools.

Objetivos

After completing this course, you should be able to:

- Identify challenges of security teams, and assist security teams with SOAR best practices
- Identify the role of SOAR in assisting security teams
- Describe the basics of SOAR technology
- Manage licenses
- Deploy and manage FortiSOAR VM
- Configure teams, roles, and users
- Configure authentication
- Schedule the purging of audit logs and executed playbook logs
- Configure playbook recovery
- Configure environment variables
- Configure company branding
- Configure system fixtures
- Monitor and manage audit logs
- Use the configuration manager
- Monitor system resources
- Deploy, configure, manage, and troubleshoot a FortiSOAR high availability cluster
- Identify the types of logs used for troubleshooting
- Troubleshoot key services and processes on FortiSOAR

Público

This course is intended for cybersecurity professionals responsible for planning, deploying, configuring, and managing FortiSOAR deployments in a SoC environment.

Requisitos Previos

You must have an understanding of the topics covered in the following course, or have equivalent experience:

- NSE 4 FortiGate Security

Familiarity with SOC technologies and processes is recommended.
System Requirements
If you take the online format of this class, you must use a computer that has the following:

- A high-speed Internet connection
- An up-to-date web browser
- A PDF viewer
- Speakers or headphones
- One of the following:
  HTML 5 support;

An up-to-date Java Runtime Environment (JRE) with Java Plugin enabled on your web browser

You should use a wired Ethernet connection, not a WiFi connection. Firewalls, including Windows Firewall or FortiClient, must allow connections to the online labs.

Programa

1. Introduction to FortiSOAR
2. Device Management
3. High Availability
4. System Configuration
5. Searching and Upgrading
6. System Monitoring and Troubleshooting

Fechas Programadas

A petición. Gracias por contactarnos.
