Advanced Intelligent Document Processing with IBM Watson Discovery

CODE:	LENGTH:	PRICE:
W7S152G	8 Hours	€690.00

Description

Advanced Document Search with IBM Watson Discovery explores intelligent document processing at a deeper level. You learn how to create regular expressions, import rule-based models, customize query results, conduct web crawling, and teach the domain language to Watson Discovery to enhance the relevance and accuracy of your results.

Objectives

- Get data through a web crawl
- Import an existing Smart Document Understanding model to collections
- Apply Teach Domain concepts
- Create a custom Entity Extractor enrichment
- Improve the model performance by using the improve relevance function
- Illustrate previewing the application
- Create a Conversation Search project with existing collections

Audience

AI specialists who know natural language processing at an intermediate level

Prerequisites

Before taking this course, you should have at least:

- Intermediate knowledge of Watson Discovery
- Natural Language and Processing fundamentals

Experience with Watson Knowledge Studio is not required, but it is recommended to have it at an intermediate level.
