Symantec Web Protection – Edge SWG Administration R2

CODE: LENGTH: PRICE:

SYM 000269 32 Hours (4 days) €3,200.00

Description

The Symantec Web Protection—Edge SWG Administration R2 course provides a detailed introduction to the features that comprise Edge SWG, which is the on-premise component of Symantec Network Protection.

These applications include Edge SWG (Edge SWG), Management Center, Reporter, Content Analysis, and High Risk Isolation. This course includes practical hands-on exercises that enable students to test their understanding of the concepts presented in the lessons.

Objectives

By the completion of this course, you will be able to:

- Describe the major Edge SWG functions and capabilities
- · Write policies to defend enterprise networks against malware attacks and to enforce acceptable Internet browsing behavior
- Understand how the various applications work together to secure enterprise networks
- View reports and monitor solution performance

Prerequisites

- · Basic understanding of networking concepts
- Basic understanding of network security concepts
- · Basic understanding of the use of proxy servers

Programme

Module 1: Introduction to Symantec Edge SWG

- Overview of Web Protection Suite
- Overview of Edge SWG components

Module 2:Intercepting web traffic and applying policy

- How the ProxySG intercepts traffic
- Writing policy on the ProxySG

- Layer and rule evaluation order in the VPM
- · Inform users when web access is denied or restricted due to policy

Module 3:Applying security and web usage policy to encrypted traffic

- Introduction to TLS
- Managing HTTPS traffic on the ProxySG

Module 4: Centrally managing devices with Management Center

- · How Management Center centralizes and simplifies device management
- Configuring the ProxySG with the ProxySG Admin Console
- · Creating and distributing VPM policies
- · Creating and managing jobs
- · Use reports to analyze web browsing activity

Module 5:Providing security and web usage policies based on role or group

- · Authentication basics on the ProxySG
- Using IWA authentication on the ProxySG
- Authentication modes in explicit and transparent modes
- Connecting to the Windows domain directly using IWA direct
- Connecting to the Windows domain using IWA BCAAA
- · Using roles and groups in policy

Module 6: Enforcing corporate guidelines for acceptable Internet browsing behavior

- · Create strong corporate guidelines for acceptable Internet use
- Use website categorization to enforce acceptable use guidelines
- Provide the ProxySG with categorization databases to be referenced in policy
- Set the Request URL Category object in policy to enforce acceptable use guidelines

Module 7: Protecting the endpoint from malicious activity

- · WebPulse technical details
- Introduction to Intelligence Services
- Using Intelligence Services data feeds in policy
- Ensuring safe downloads

Module 8: Providing security for risky and unknown websites with High Risk Isolation

- Introduction to High Risk Isolation
- Configuring HRI
- Overview of Symantec Web Isolation

Module 9: Enhancing security with virus scanning

- Introduction to Content Analysis
- Exploring the Content Analysis management console
- · Configuring communication with the ProxySG over ICAP
- · Configuring malware scanning options

Module 10: Using malware analysis to analyze potentially malicious files

- · Introduction to malware analysis
- Preparing the use malware analysis
- · Performing malware analysis

Module 11: Monitoring Edge SWG features

- · Monitoring devices from within Management Center
- Monitor and maintain the Content Analysis
- Troubleshooting tips

Module 12: Reporting for Edge SWG features

- · How Reporter delivers centralized web reporting
- Configuring access logging on Edge SWG
- Using the Reporter Admin Console to configure log processing on Reporter

Module 13: Understanding SGOS architecture and caching on the Edge SWG

- · SGOS architecture
- · Caching on the Edge SWG
- Using HTTP compression

Module 14: Using built-in diagnostic tools on the Edge SWG

- · Exploring sysinfo files
- Using policy tracing and policy coverage
- · Using packet captures
- Sending service information to Symantec

Module 15: Expanding security with cloud integrations

- · Introduction to Cloud SWG
- Using Universal Policy Enforcement
- Integrating CloudSOC with Symantec Network Protection

Module 16: Course review

• Symantec Web Protection--Edge SWG Administration R2 course review

Appendix A: Using Content Policy Language (CPL)

- SSP hardware platform overview
- Introduction to ISG

Appendix B: Using Content Policy Language (CPL)

- Basic CPL concepts
- Intermediate CPL concepts
- Using CPL best practices

Appendix C: Introduction to Hypertext Transport Protocol (HTTP)

• Basic HTTP concepts

Follow on courses

Additional Courses Available

- Web Protection Cloud SWG Administration R2
- Web Protection Cloud SWG Diagnostics and Troubleshooting R2
- Web Protection Edge SWG Diagnostics and Troubleshooting R2

Test and Certification

The 250-589: Symantec Web Protection – Edge SWG R2 Technical Specialist certification exam includes content from this course and its companion course, Symantec Web Protection – Edge SWG Diagnostics & Troubleshooting R2 Available at an additional cost.
