## Description

This course is for Splunk administrators. The course provides the fundamental knowledge of deploying and managing Splunk Enterprise in a clustered environment.

## Audience

Splunk Administrators

## Prerequisites

- To be successful, students must have completed these Splunk Education course(s) or have equivalent working knowledge:
  - Intro to Splunk
  - Using Fields
  - Introduction to Knowledge Objects
  - Creating Knowledge Objects
  - Creating Field Extractions
  - Splunk Enterprise System Administration
  - Splunk Enterprise Data Administration
  - Troubleshooting Splunk Enterprise
- Additional courses and/or knowledge in these areas are also highly recommended:
  - Enriching Data with Lookups
  - Data Models

## Programme

### Module 1 – Overview of Large-scale Splunk Deployment

- Identify factors that affect large-scale deployment design
- Describe approaches to scaling Splunk Enterprise
- Configure Splunk License Manager

### Module 2 – Deploying Single-site Indexer Clusters

- Identify indexer cluster states
- Define replication factor and search factor
- Implement a single-site indexer cluster

### Module 3 – Deploying Multisite Indexer Clusters

- Define site replication factor and site search factor
- Define search affinity
- Implement a multisite indexer cluster

### Module 4 – Updating Indexer Cluster Peer Configurations

- Distribute configurations and apps across peers

### Module 5 – Managing and Monitoring Indexer Clusters

- Enable replication for clustered indexes
- Configure Monitoring Console for indexer cluster environment

### Module 6 – Configuring Indexer Discovery on Forwarders

- Configure indexer discovery
- Configure indexer acknowledgment
- Configure forwarder site failover

### Module 7 – Deploying Search Head Clusters

- Configure a search head cluster
- Connect clustered and non-clustered indexers

### Module 8 – Managing and Monitoring Search Head Clusters

- Deploy configuration bundles to search head cluster members

- Manage captaincy and member addition, removal and upgrades

Module 9 – Using KV Store in a Search Head Cluster

- Enable KV Store collection replication in a search head cluster

- Monitor KV Store status with Monitoring Console

## Session Dates
