Description

Nosta VMware vSphere ympäristöjen suunnittelutaitosi seuraavalle tasolle ja nosta taitosi ylläpitäjämästä arkkitehdiksi. VMware vSphere: Design 8 kurssilla opit suunnittelemaan, mitoittamaan ja määrittelemään VMware vSphere ympäristöjä. Samalla opit myös muuhun käyttöön sopivia tehokkaita suunnittelua, määrittelyä ja dokumentointimenetelmiä. Käsittelemme myös kokonaisarkkitehtuuria ja sen määrittelyä ja kuvausta menetelmiä kuten TOGAF ja Zachman.

Huom. tällä VMware vSphere: Design -kurssilla ei toteuteta määrittelyä vaan suunnitellaan ympäristö ja sille parhaat mahdolliset määrittelyt, siksi kurssi harjoitukset ovat 'kynä ja paperi' / Word ja Excel -harjoituksia. Mitään ns. VMware Lab ympäristöä ei kurssissa käytetä.

Kurssi painottuu kouluttajan johdolla tapahtuviin yhteisiin keskusteluihin harjoituksissa määriteltävien tavoitteiden parhaaksi ratkaisuksi.

Kurssin vetäjänä toimii pitkäaikainen VMware vSphere -ammattilainen, VCI, VCIX, VCAP Pertti Pellonpoika. Opetus on suomeksi. Kouluttaja täydentää tällä kurssilla VMware materiaalia omalla syventävällä materiaalilla tarpeen mukaan.

Objectives

Kurssin jälkeen sinulla on tarvittavat taidot suunnitella, mitoittaa ja tehdä määrittelyt kuhunkin ympäristöön parhaan mahdollisen VMware vSphere ympäristön luomiseksi sekä edellytykset VCAP-DCV Design -testiin.

Kurssin jälkeen sinulla on erityisesti seuraavat taidot:

- Create a vSphere design given a case study
 - Identify and assess the business objectives of the vSphere environment
 - Identify business requirements, constraints, assumptions, and risks, for all layers in the vSphere environment
 - Apply a framework to a design
 - Analyze design choices for vCenter, ESXi, storage, networking, vSphere clusters, and virtual machines
 - Identify design decisions to ensure manageability, which include scalability, capacity planning and lifecycle management
 - Identify design decisions to ensure that the vSphere environment is highly available
 - Identify design decisions to ensure that the vSphere environment performs well
 - Identify design decisions to ensure that the vSphere environment is secure
-
- Identify design decisions to ensure that the vSphere environment can recover from data loss or disaster

Audience

Kurssi on tarkoitettu erityisesti arkkitehdeille ja konsulteille (tai sellaiseksi aikovalle), mutta myös kaikille, jotka osallistuvat omien VMware vSphere ympäristöjen käyttöönottoihin. Erityisesti kurssi sopii myös VCAP-DCV Design sertifiointiin tähtääville.

Prerequisites

Tämän kurssin esivaatimuksena on hyvä käytännön kokemus tai VMware kurseista suoritettuna VMware vSphere: Fast Track tai VMware vSphere: Operate, Scale and Secure. Kurssi sopii myös erityisesti VCP-DCV sertifiointiin suorittaneille jatkokurssiksi.

- 1 Course Introduction • Introductions and course logistics • Course objectives
- 2 Infrastructure Assessment
- Describe various design framework principles
 - Follow a proven process to design a virtualization solution
 - Define customer business objectives and requirements
 - Use a systematic method to evaluate and document a conceptual model
 - Create a logical design from a conceptual model
 - Recognize key information contained in the physical design
- 3 Designing for Manageability: Capacity Planning • Make capacity planning design decisions that adhere to business requirements
- Design capacity planning strategies that meet the needs of the vSphere environment and follow VMware best practices
 - Calculate compute and storage requirements for the VMs in the vSphere environment
- 4 Designing for Manageability: Scalability
- Make scalability design decisions that adhere to business requirements
 - Design scalability strategies that meet the needs of the vSphere environment and follow VMware best practices
- 5 Designing for Manageability: Lifecycle Management
- Make lifecycle management design decisions that adhere to business requirements

- Design lifecycle management strategies that meet the needs of the vSphere environment and follow VMware best practices
- 6 Designing for Availability • Make availability design decisions that adhere to business requirements
- Design availability strategies that meet the needs of the vSphere environment and follow VMware best practices
- 7 Designing for Performance • Make performance design decisions that adhere to business requirements
- Design performance strategies that meet the needs of the vSphere environment and follow VMware best practices
- 8 Designing for Security • Make security design decisions that adhere to business requirements
- Design security strategies that meet the needs of the vSphere environment and follow VMware best practices
- 9 Designing for Recoverability • Make recoverability design decisions that adhere to business requirements
- Design recoverability strategies that meet the needs of the vSphere environment and follow VMware best practices

Programme

- 1 Course Introduction • Introductions and course logistics • Course objectives
- 2 Infrastructure Assessment
 - Describe various design framework principles
 - Follow a proven process to design a virtualization solution
 - Define customer business objectives and requirements
 - Use a systematic method to evaluate and document a conceptual model
 - Create a logical design from a conceptual model

- 3 Designing for Manageability: Capacity Planning • Make capacity planning design decisions that adhere to business requirements
 - Design capacity planning strategies that meet the needs of the vSphere environment and follow VMware best practices
 - Calculate compute and storage requirements for the VMs in the vSphere environment
- 4 Designing for Manageability: Scalability
 - Make scalability design decisions that adhere to business requirements
 - Design scalability strategies that meet the needs of the vSphere environment and follow VMware best practices
- 5 Designing for Manageability: Lifecycle Management
 - Make lifecycle management design decisions that adhere to business requirements
 - Design lifecycle management strategies that meet the needs of the vSphere environment and follow VMware best practices
- 6 Designing for Availability • Make availability design decisions that adhere to business requirements
 - Design availability strategies that meet the needs of the vSphere environment and follow VMware best practices
- 7 Designing for Performance • Make performance design decisions that adhere to business requirements
 - Design performance strategies that meet the needs of the vSphere environment and follow VMware best practices
- 8 Designing for Security • Make security design decisions that adhere to business requirements
 - Design security strategies that meet the needs of the vSphere environment and follow VMware best practices
- 9 Designing for Recoverability • Make recoverability design decisions that adhere to business requirements
 - Design recoverability strategies that meet the needs of the vSphere environment and follow VMware best practices

Test and Certification

Tämä kurssi valmentaa hyvin VMware vSphere 8.x Advanced Design (3V0-21.23) -testiin, jolla saavutat VMware Certified Advanced Professional – Data Center Virtualization (VCAP-DCV) Design 2024 sertifioinnin.

Session Dates

Date	Location	Time Zone	Language	Type	Guaranteed	PRICE
09 Apr 2025	Virtual Classroom (CET +1 / UTC +2)		English	Instructor Led Online		€2,750.00
09 Apr 2025	Espoo Arrow Classroom (CET +1 / UTC +2)		English	Classroom		€2,750.00

Additional Information
