Korn and Bash Shell Programming

CODE:	DURÉE:	PRIX H.T.:
AN202G	40 Hours (5 Jours)	€3,990.00

Description

This course will teach you how to use shell scripts and utilities for practical system administration of AIX (or other UNIX) operating systems.

Objectifs

You will have a firm grounding in the Perl language and be able to:

- Write Perl scripts for data-processing, system administration, and other applications
- Use modules from the Perl Module Library to improve your efficiency

Audience

This course is for support staff for AIX on POWER systems

Prérequis

You should have:

- An understanding of programming fundamentals: variables, flow control concepts such as repetition **and** decision.
- A working knowledge of AIX including the use of the vi editor, find **and** grep commands.

Students without this experience should attend *AIX Basics (AN10G)*.

Programme

- Basic shell concepts
- Flow control in a shell Script
- Functions and typeset
- Shell features such as arithmetic and string handling
- Using regular expressions
- Using sed, awk and other AIX utilities

Dates de session

Sur demande. [Merci de nous contacter](#)
