# Developing Rule Solutions in IBM Operational Decision Manager V8.6

CODE: DURÉE: PRIX H.T.:

ZB390G 40 Hours €1,500.00

# **Description**

An updated version of this course is available. For more information, click *Developing Rule Solutions in IBM Operational Decision Manager V8.7* (ZB392G).

This course is also available as classroom course *Developing Rule Solutions in IBM Operational Decision Manager V8.6* (WB390G).

This course introduces developers to IBM Operational Decision Manager V8.6. In this course, you learn the concepts and skills that you need to design, develop, and integrate a business rule solution with Operational Decision Manager.

For information about other related courses, visit the IBM Training website:

http://www.ibm.com/training

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the **Self-Paced Virtual Classes and Web-Based Training Classes** on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course. http://www.ibm.com/training/terms

## **Objectifs**

- Describe the benefits of implementing a decision management solution with Operational Decision Manager
- Identify the key user roles that are involved in designing and developing a decision management solution, and the tasks that are associated with each role
- Describe the development process of building a business rule application and the collaboration between business and development teams
- Set up and customize the business object model (BOM) and vocabulary for rule authoring
- Implement the execution object model (XOM) that enables rule execution
- Orchestrate rule execution through ruleflows
- Author rule artifacts to implement business policies
- Debug business rule applications to ensure that the implemented business logic is error-free
- Set up and customize the testing and simulation environment for business users
- Package and deploy rulesets to testing and production environments
- Integrate decision services for managed execution within an enterprise environment
- Build client applications to invoke ruleset execution
- Test, monitor, and audit execution of decision services
- Work with Operational Decision Manager features that support decision governance, including the decision governance framework for decision services

#### **Audience**

This intermediate course is designed for application developers.

## **Prérequis**

You should have:

- Experience with the Java programming language and object-oriented concepts
- Experience with Java Platform, Standard Edition (Java SE)
- Knowledge of Java Platform, Enterprise Edition (Java EE)
- Basic knowledge of Extensible Markup Language (XML)

Note: If you do not meet all of the requirements, you can still complete the lab exercises for this class by following the step-by-step instructions that are provided.

## **Programme**

- · Course introduction
- Introducing IBM Operational Decision Manager V8.6
- Exercise: Operational Decision Manager in action
- · Getting started with business rule application development
- Exercise: Setting up rule projects
- · Programming with business rules
- · Developing object models
- Exercise: Working with the BOM
- · Exercise: Refactoring
- · Orchestrating ruleset execution
- Exercise: Working with ruleflows
- · Authoring rules
- Exercise: Exploring action rules
- Exercise: Authoring action rules
- Exercise: Authoring decision tables and decision trees
- · Customizing rule vocabulary with categories and domains
- Exercise: Working with static domains
- Exercise: Working with dynamic domains
- · Queries and ruleset extraction
- · Exercise: Queries and ruleset extraction
- Debugging rules
- · Exercise: Executing rules locally
- · Exercise: Debugging a ruleset
- Enabling tests and simulations
- · Exercise: Enabling tests and simulations
- Managing deployment
- · Exercise: Managing deployment
- Executing rules with Rule Execution Server
- Exercise: Exploring the Rule Execution Server console
- Exercise: Executing rules with Rule Execution Server in Java SE
- Exercise: Executing rules with Rule Execution Server in Java EE
- Exercise: Executing rules as a hosted transparent decision service (HTDS)
- Auditing and monitoring ruleset execution
- Exercise: Auditing ruleset execution through Decision Warehouse
- · Working with the REST API
- Exercise: Working with the REST API
- · Introducing decision governance
- Exercise: Working with decision services
- Course summary
