OpenShift Enterprise Development

CODE:	DURÉE:	PRIX H.T.:
REH_DO290	21 Hours (3 Jours)	€2,100.00

Description

OpenShift Enterprise Development (DO290) is part of a series of courses that focus on using [OpenShift Enterprise by Red Hat®](#) to automate a portion of the software delivery pipeline. The course immerses the student in a DevOps environment through the use of agile software development methodology, test-driven development, continuous integration, and a standard operating environment through the use of Platform-as-a-Service (PaaS).

Training Development

Course introduction

Introduce and review the course.

Development environment review

Describe the developer's tools, agile practices, and deployment environment that will be utilized in this course.

Bookstore application review

Become familiar with the course application architecture, features, and project layout.

Introduction to OpenShift Enterprise

Describe the features and architecture of OpenShift Enterprise.

Deploy applications on OpenShift Enterprise

Define, build, and deploy an application on OpenShift Enterprise.

Implement continuous integration

Establish continuous integration with Jenkins.

Manage OpenShift Enterprise applications

Control and maintain applications using the OpenShift Enterprise command line interface.

Create complex deployments

Create deployments that utilize clustering, load balancing, and customized node scheduling.

Troubleshoot applications

Use debugging and logs to troubleshoot problems with application performance or deployment issues.

Customize OpenShift Enterprise

Create custom source image containers, templates, and builders.

Course review

Practice the skills learned in this course.
