Enterprise Service Bus Deployment with Red Hat JBoss Fuse

CODE: **DURÉE:** **PRIX H.T.:**

REH_JB435 16 Hours (2 Jours) €1,520.00

Description

Enterprise Service Bus (ESB) Deployment with Red Hat® JBoss® Fuse is a hands-on course that gives System Administrators and Java™ developers an understanding of Red Hat JBoss Fuse, a commercially supported distribution of Apache ServiceMix.

Training Development

Learn about the major concepts that underlie the JBoss Fuse/OSGi environment, including architecture, major subsystems, and dependencies on other products.

Install and customize Red Hat JBoss Fuse

- Locate, install, and familiarize yourself with Red Hat JBoss Fuse customizations.

Manage Red Hat JBoss Fuse

- Use command line to exercise many subsystems of JBoss Fuse.

Implement OSGi in production

- Identify the concerns OSGi addresses and how Red Hat JBoss Fuse solves for these concerns to improve development productivity.

Understand Fuse Application Bundles

- Understand the differences and benefits between OSGi bundles and Fuse Application Bundles.

Manage Red Hat JBoss Fuse in large deployment scenarios

- Create, customize, and deploy new servers for a production environment.

Implement security in Red Hat JBoss Fuse

- Customize Red Hat JBoss Fuse to deploy a secure environment for management.

Fabric in Red Hat JBoss Fuse

- Understand enterprise management of Red Hat JBoss Fuse-based integration solutions.

Developing with Red Hat JBoss Developer Studio

- Understand the advantages of using Red Hat JBoss Developer Studio with the integration stack to improve developers' productivity.

Note: Course outline is subject to change with technology advances and as the nature of the underlying job evolves. For questions or confirmation on a specific objective or topic, please [contact a training specialist](#).
