# Maximo Application Suite - Manage: Automation Scripting

**CODE:**      **DURÉE:**      **PRIX H.T.:**

MAX4336G      5.52 Hours      €454.00

## Description

In this course, you will learn about automation scripting in Maximo, including how automation scripts can be used to extend functionality using code written in Python or JavaScript. This includes learning about launch points, variables and Maximo business objects in Maximo and how to use them and write scripts and run them with different launch points. Along with a combination of procedural information and demonstrations, this course also has hands-on lab exercises using a Red Hat OpenShift Maximo Manage environment for you to try out.

## Objectifs

After completing this course, you should be able to:

- Learn about Automation Scripting application in Maximo.
- Discuss the benefits of Automation Scripting.
