F#RTINET. **FortiManager Administrator Training**

CODE:	LENGTH:	PRICE:
FNT_FT-FMG	16 Hours (2 days)	Request Price

Description

In this course, you will learn the fundamentals of using FortiManager for the centralized network administration of many FortiGate devices.
In interactive labs, you will explore deployment strategies, which include single or multiple ADOMs, device registration, policy packages, shared objects, installing configuration changes, provisioning FortiManager as a local FortiGuard distribution server, and troubleshooting the features that are critical to day-to-day use after you deploy FortiManager.

Objectives

After completing this course, you will be able to:

- Describe the key features and capabilities of FortiManager

- Understand FortiManager API and meta fields

- Deploy administrative domains (ADOMs) to support multiple customers on a single FortiManager

- Restrict concurrent ADOM access by using workspaces and workflow mode

- Use provisioning templates for device-level changes across many devices

- Identify the synchronization states and manage the revision history of managed devices

- Manage firewall policies across multiple FortiGate devices using policy packages with shared and dynamic objects

- Deploy policies and objects from the global ADOM to multiple ADOMs

- Understand the Fortinet Security Fabric with FortiManager

- Describe high-availability (HA), backup, and recovery options for FortiManager

- Manage the firmware of supported devices centrally

- Offer a local FortiGuard distribution server to your Fortinet devices

- Diagnose and troubleshoot import and installation issues

Audience

Anyone who is responsible for the day-to-day management of FortiGate security policies using the FortiManager platform should attend this course.

Prerequisites

- Knowledge of firewall concepts in an IPv4 network

- Familiarity with all topics in the *FCP - FortiGate Administrator* course.

- Basic understanding of network management systems

Programme

1. Introduction and Initial Configuration

2. Administration and Management

3. Device Registration

4. Device-Level Configuration and Installation

5. Policy and Objects

6. Global ADOM and Central Management

7. Diagnostics and Troubleshooting

8. Additional Configuration

Further Information

System Requirements: If you take the online format of this class, you must use a computer that has the following:

- A high-speed Internet connection

- An up-to-date web browser

- A PDF viewer

- Speakers or headphones

- One of the following:

    - HTML 5 support

    - An up-to-date Java Runtime Environment (JRE) with Java Plugin enabled on your web browser

You should use a wired Ethernet connection, *not* a WiFi connection. Firewalls, including Windows Firewall or FortiClient, must allow connections to the online labs.

Session Dates

On request. Please contact us

Additional Information

This training is also available as onsite training. Please contact us to find out more.
