Description

Commvault Professional V11

Learn essential skills for installing and configuring Commvault® software to protect data in virtual and physical infrastructures. This 5-day course provides all the information needed to get your Commvault environment up and running including: CommServe® server configuration, MediaAgent design, agent deployment, storage configuration, and data security. The class is balanced between technical discussions using detailed diagrams and white board sessions, and hands-on labs using Education Services CVLab environment focusing on both the Admin Console and the CommCell® Console.

Certification

Completion of this course helps you prepare for the **Commvault Certified Professional V11 Certification**. The **Commvault Certified Professional Exam (V11)** exam is included free of charge as a part of the **Commvault Certified Professional Exam (V11)** instructor and virtual instructor-led course registration.
