Commvault Professional Foundations - Exam Included

CODE:	LENGTH:	PRICE:
COM_PF	24 Hours (3 days)	€2,160.00

Description

Learn how to manage your Commvault environment with the Command Center. Build on foundational concepts including Commvault terminology and architecture, along with a lesson in navigating the Command Center. You will then learn how to configure storage targets and take advantage of deduplication technology to maximize storage resources and improve network bandwidth, create security rules to manage users by roles and groups, and use network topologies to ensure that data flows only through intended paths. Once these required configurations are complete, you will be guided through the setup of several features to prepare Commvault to protect a number of workload categories. The course continues with options for backing up data, browsing and recovering data, and setting up plans so that your backups run efficiently and effectively. Finally, learn to monitor your environment with dashboards, alerts, and reports.
