# F#RTINET. FortiDDoS Training

CODE: LENGTH: PRICE:

FTN FT-FDD 16 Hours (2 days) €2,115.00

# **Description**

In this course, you will learn how to form network baseline data, and how to recognize and mitigate individual and distributed denial of service attacks while preserving service and network performance.

# **Objectives**

After completing this course, you will be able to:

- Train your FortiDDoS to recognize your unique network patterns
- Choose the right FortiDDoS model
- · Defend against both volumetric and mechanistic DDoS attacks
- Deploy FortiDDoS to protect both network appliances and servers
- Understand when to use detection and prevention modes
- Implement bypass or a high availability FortiDDoS cluster for maximum service uptime
- Detect connections from proxies
- Describe how the blocking periods and penalty factors intelligently determine which packets are dropped after an attack is detected
- Configure access control lists and blocklists
- Mitigate anomalies and SYN floods
- Understand the main characteristics of protection policies
- · Characterize different types of attacks by using logs and statistics graphs
- Troubleshoot incorrect threshold levels

#### **Audience**

Cybersecurity professionals responsible for the day-to-day administration, management, and troubleshooting of a FortiDDoS F-Series device should attend this course.

# **Prerequisites**

You should have an understanding of the topics covered in the following courses, or have equivalent experience:

- NSE 4 FortiGate Security
- NSE 4 FortiGate Infrastructure

### **Programme**

- 1. Introduction and Deployment
- 2. Initial Configuration
- 3. Monitoring and Reporting
- 4. Global Settings
- 5. Service Protection

# **Further Information**

**System Requirements** If you take the online format of this class, you must use a computer that has the following:

- A high-speed Internet connection
- An up-to-date web browser
- A PDF viewer
- Speakers or headphones
- One of the following:
  - o HTML 5 support
  - o An up-to-date Java Runtime Environment (JRE) with the Java Plugin enabled in your web browser

You should use a wired Ethernet connection, not a Wi-Fi connection. Firewalls, including Windows Firewall or FortiClient, must allow connections to the online labs.

# **Session Dates**

On request. Please contact us

# **Additional Information**

This training is also available as onsite training. Please contact us to find out more.
